 - Limit investments to those designated under the authorized investment section herein and to those investments having a credit rating at least equal to that specified in CRS 24-75-601.
 - Pre-qualifying financial institutions, broker/dealers, and intermediaries with which the District does business.

- Diversifying the investment portfolio to minimize potential losses.
2. Interest Rate Risk is the risk that market value of securities will fall due to changes in market interest rates. To minimize interest rate risk the District shall:
- Structure the investment portfolio so that investments mature in a manner to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities prior to maturity.
 - Investing operating funds in shorter term instruments.
- C. Liquidity. The investment portfolio shall remain sufficiently liquid to meet all operating and capital expenditure requirements that may be reasonably anticipated. The portfolio shall be structured so that investments mature concurrent with cash needs to meet anticipated demands. Furthermore, the portfolio shall consist largely of investments with active secondary or resale markets.

Return on investment is of secondary importance to the safety and liquidity objectives described above.
