

WATER WATCH REPORT

January 21, 2020

Supply Reservoir Contents

Reservoir	Capacity (acre-feet)		Current Usable Contents (acre-feet)	Percent Full		
	Total	Usable		Current	Last Year	Historical Median
Antero	19,881	19,826	19,781	100%	95%	99%
Eleven Mile	97,779	97,779	99,795	102%	102%	102%
Cheesman	79,064	79,064	57,935	73%	76%	83%
Marston	19,256	13,133	9,369	71%	66%	54%
Strontia Springs	7,863	7,163	6,204	87%	90%	93%
Chatfield	27,076	10,782	9,178	85%	95%	84%
Dillon	257,304	249,095	222,786	89%	71%	91%
Gross	41,811	29,811	20,149	68%	51%	52%
Ralston	10,776	7,276	1,576	22%	51%	64%
Meadow Creek	5,370	4,520	0	0%	0%	14%
Total	566,180	518,449	446,774	86%	77%	82%

Daily Use

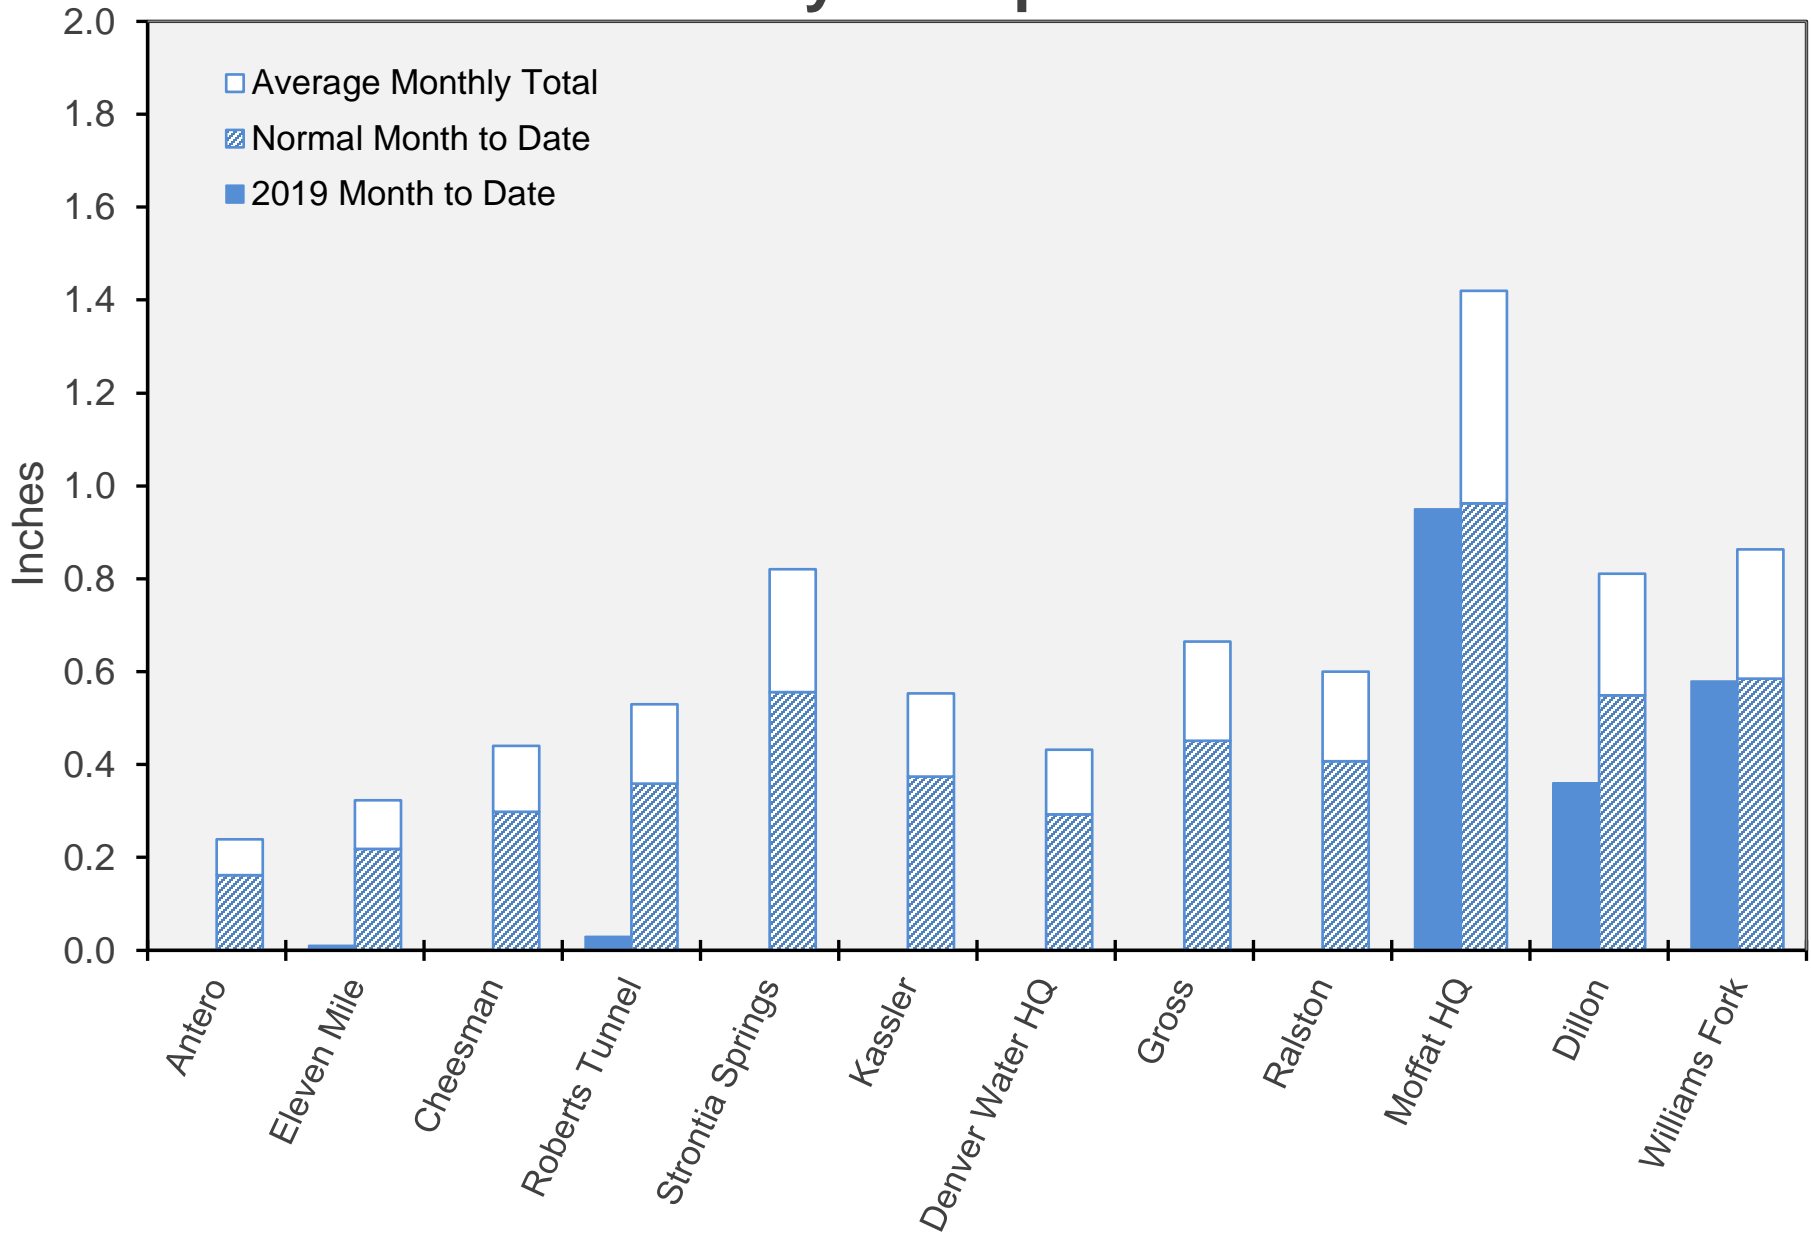

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

January Precipitation

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

Snowpack: South Platte River Watershed

Snowpack: Colorado River Watershed

% of 2020 Expected Daily Use	98%												98%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after January 1, 2019. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on January 6, 2020. 6) Daily water figures are subject to change.

Lake Powell Report*

Data are from the 115 SNOTEL stations above Lake Powell located in Colorado, Utah and Wyoming

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
