

WATER WATCH REPORT

May 26, 2020

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Last Year	Historical Median	
	Total	Usable	Current			
Antero	19,881	19,826	19,716	99%	98%	100%
Eleven Mile	97,779	97,779	99,349	102%	102%	102%
Cheesman	79,064	79,064	45,568	58%	78%	92%
Marston	19,256	13,133	7,766	59%	60%	77%
Strontia Springs	7,863	7,163	6,440	90%	86%	93%
Chatfield	27,076	10,782	9,353	87%	99%	93%
Dillon	257,304	249,095	238,787	96%	73%	92%
Gross	41,811	29,811	20,864	70%	28%	54%
Ralston	10,776	7,276	4,286	59%	60%	82%
Meadow Creek	5,370	4,520	1,150	25%	0%	33%
Total	566,180	518,449	453,279	87%	77%	87%

Daily Use

May 26, 2020

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

May 26, 2020

May Precipitation

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

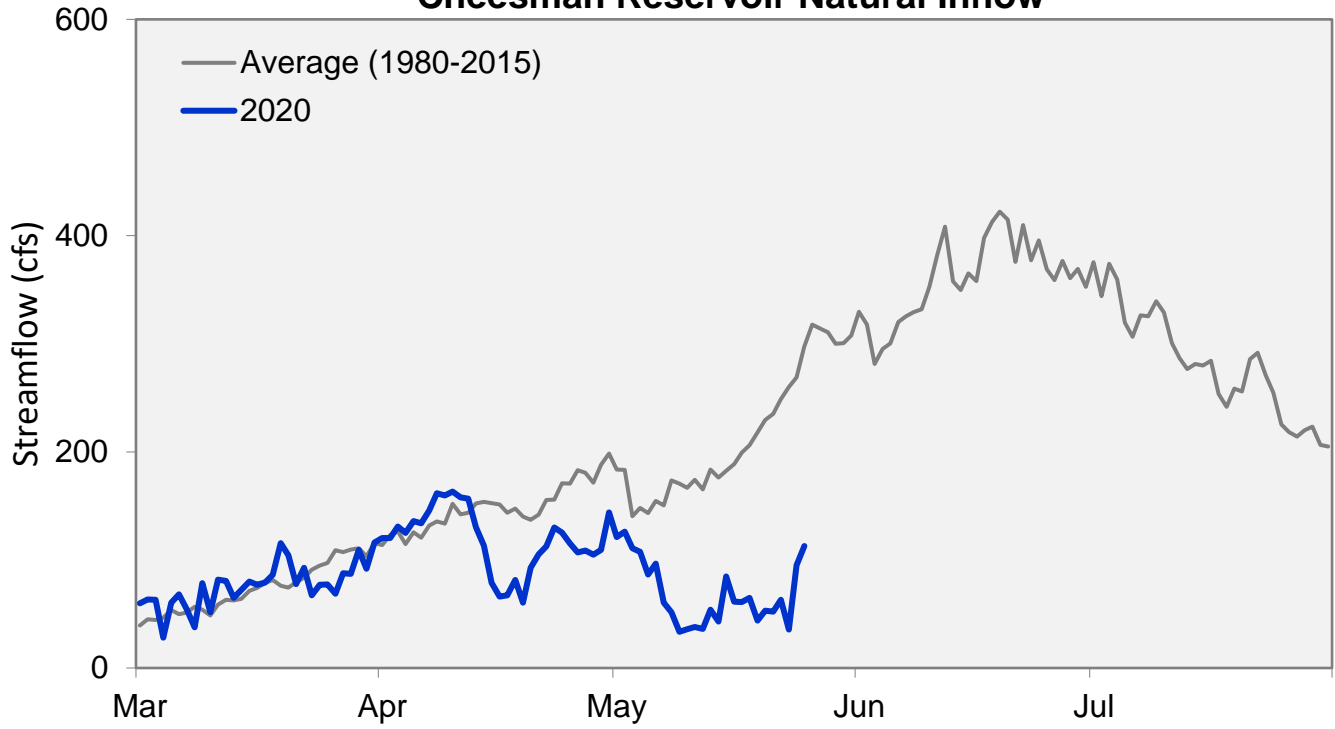

Snowpack: South Platte River Watershed

Snowpack: Colorado River Watershed

Cheesman Reservoir Natural Inflow

Dillon Reservoir Natural Inflow

2020 Water Use and Weather Conditions

May 26, 2020

Denver Water Use and Reservoir Contents 2020													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	483,700												
Actual End-of-Month Supply Reservoir Contents (AF)	445,828	441,137	439,113	440,306									
Actual % Full	86%	85%	85%	85%	85%								
Historical Median % Full	81%	80%	79%	79%									
2020 Expected Daily Use (MG)	110	109	108	127	172	272	298	282	248	150	109	105	124
Actual Daily Use (MG)	1	97	106	103	109	180							
	2	106	104	102	97	194

	28	106	101	97	154								
	29	105	103	104	176								
	30	106		104	180								
	31	108		100									
Monthly Average	107	104	104	116	232								130
% of 2020 Expected Daily Use	97%	96%	97%	91%	135%								105%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after April 1, 2020. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on April 6, 2020. 6) Daily water figures are subject to change.

Lake Powell Report*

Data are from the 115 SNOTEL stations above Lake Powell located in Colorado, Utah and Wyoming

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
