

WATER WATCH REPORT

June 15, 2020

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Last Year	Historical Median	
	Total	Usable	Current			
Antero	19,881	19,826	19,890	100%	100%	100%
Eleven Mile	97,779	97,779	100,450	103%	104%	102%
Cheesman	79,064	79,064	54,067	68%	87%	96%
Marston	19,256	13,133	7,766	59%	83%	77%
Strontia Springs	7,863	7,163	6,399	89%	102%	94%
Chatfield	27,076	10,782	10,087	94%	96%	87%
Dillon	257,304	249,095	246,538	99%	84%	97%
Gross	41,811	29,811	29,563	99%	73%	79%
Ralston	10,776	7,276	6,529	90%	78%	89%
Meadow Creek	5,370	4,520	3,015	67%	42%	64%
Total	566,180	518,449	484,304	93%	88%	93%

Daily Use

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

June 15, 2020

June Precipitation

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

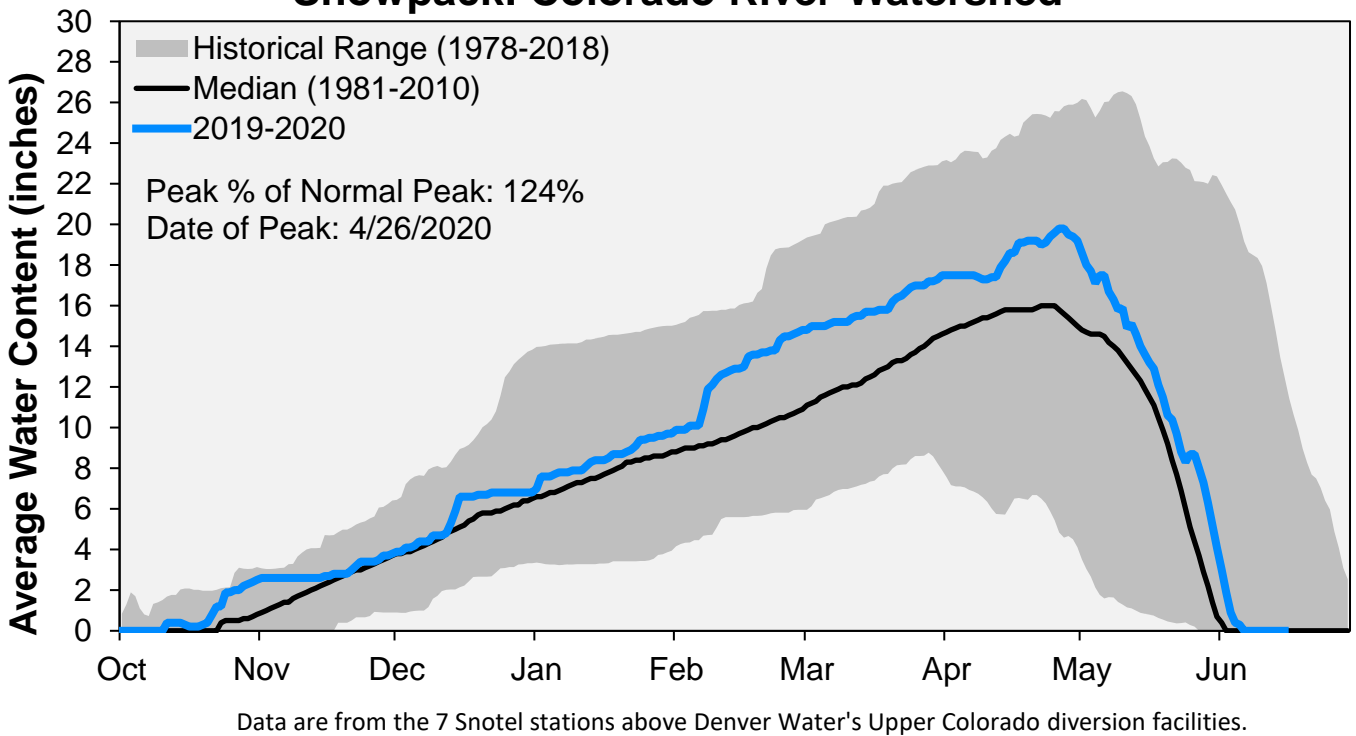

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

Snowpack: South Platte River Watershed

Snowpack: Colorado River Watershed

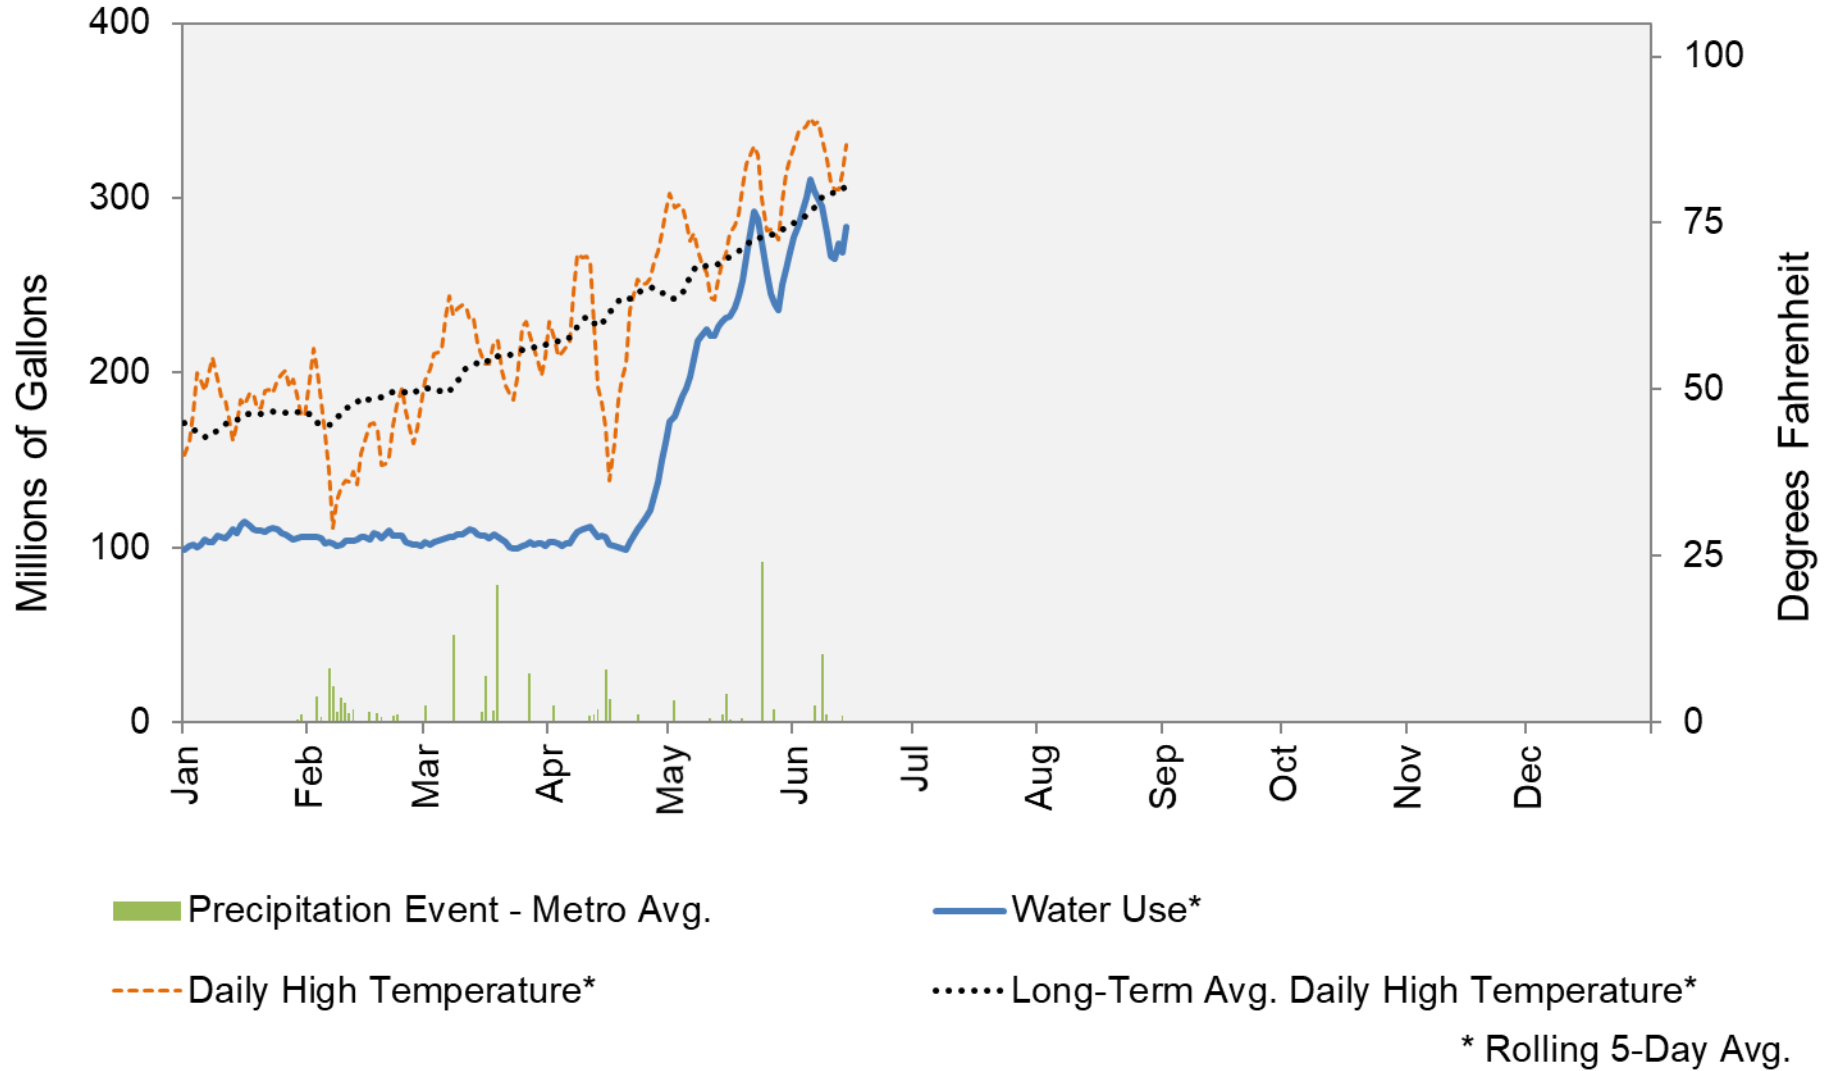

Cheesman Reservoir Natural Inflow

Dillon Reservoir Natural Inflow

2020 Water Use and Weather Conditions

June 15, 2020

Denver Water Use and Reservoir Contents 2020													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	513,400												
Actual End-of-Month Supply Reservoir Contents (AF)	445,828	441,137	439,113	440,306	457,594								
Actual % Full	86%	85%	85%	85%	88%	99%							
Historical Median % Full	81%	80%	79%	79%	88%								
2020 Expected Daily Use (MG)	110	109	108	127	172	272	298	282	248	150	109	105	138
Actual Daily Use (MG)	1	97	106	103	109	194	316						
	2	106	104	102	97	170	293

	30	106		104	180	257							
	31	108		100	274								
Monthly Average	107	104	104	116	239	289							148
% of 2020 Expected Daily Use	97%	96%	97%	91%	139%	106%							107%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after April 1, 2020. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on April 6, 2020. 6) Daily water figures are subject to change.

Lake Powell Report*

Data are from the 115 SNOTEL stations above Lake Powell located in Colorado, Utah and Wyoming

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
