

## WATER WATCH REPORT

June 29, 2020

### Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Last Year	Historical Median	
	Total	Usable	Current			
Antero	19,881	19,826	19,738	100%	100%	100%
Eleven Mile	97,779	97,779	100,727	103%	106%	103%
Cheesman	79,064	79,064	62,228	79%	100%	99%
Marston	19,256	13,133	7,270	55%	88%	76%
Strontia Springs	7,863	7,163	6,666	93%	103%	95%
Chatfield	27,076	10,782	5,541	51%	103%	81%
Dillon	257,304	249,095	251,717	101%	95%	101%
Gross	41,811	29,811	29,456	99%	93%	97%
Ralston	10,776	7,276	6,738	93%	95%	93%
Meadow Creek	5,370	4,520	3,061	68%	91%	89%
<b>Total</b>	<b>566,180</b>	<b>518,449</b>	<b>493,141</b>	<b>95%</b>	<b>98%</b>	<b>97%</b>

### Daily Use

# Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

June 29, 2020

# June Precipitation

### Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

### Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

### Snowpack: South Platte River Watershed

### Snowpack: Colorado River Watershed

### Cheesman Reservoir Natural Inflow

### Dillon Reservoir Natural Inflow

## 2020 Water Use and Weather Conditions

June 29, 2020

### Denver Water Use and Reservoir Contents 2020

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	513,400												
Actual End-of-Month Supply Reservoir Contents (AF)	445,828	441,137	439,113	440,306	457,594								
Actual % Full	86%	85%	85%	85%	88%	99%							
Historical Median % Full	81%	80%	79%	79%	88%								
2020 Expected Daily Use (MG)	110	109	108	127	172	272	298	282	248	150	109	105	148
Actual Daily Use (MG)	1	97	106	103	109	194	316						
	2	106	104	102	97	170	293						
	3	103	107	106	100	184	324						
	4	102	102	106	98	204	294						
	5	99	94	107	106	203	324						
	6	110	108	106	110	229	285						
	7	99	101	106	114	220	270						
	8	105	101	105	117	234	305						
	9	121	104	112	104	219	214						
D	10	94	104	109	110	220	260						
A	11	106	109	112	115	214	277						
Y	12	112	102	114	100	218	313						
	13	119	104	99	101	262	278						
O	14	111	111	104	106	233	291						
F	15	114	104	104	108	231	342						
	16	117	103	110	94	216	315						
M	17	102	117	110	96	245	342						
O	18	107	102	107	96	294	277						
N	19	106	102	99	101	279	269						
T	20	114	113	96	106	297	281						
H	21	114	112	102	116	284	285						
	22	111	103	96	115	305	325						
	23	110	102	103	114	276	303						
	24	104	104	102	116	210	336						
	25	103	95	103	129	211	295						
	26	108	106	106	135	226	291						
	27	103	101	100	156	274	265						
	28	106	101	97	154	257	296						
	29	105	103	104	176	283							
	30	106		104	180	257							
	31	108		100	274								
Monthly Average	107	104	104	116	239	295							160
% of 2020 Expected Daily Use	97%	96%	97%	91%	139%	109%							108%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after April 1, 2020. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on April 6, 2020. 6) Daily water figures are subject to change.

# Lake Powell Report\*

Data are from the 115 SNOTEL stations above Lake Powell located in Colorado, Utah and Wyoming

\* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
