

WATER WATCH REPORT

July 6, 2020

Supply Reservoir Contents

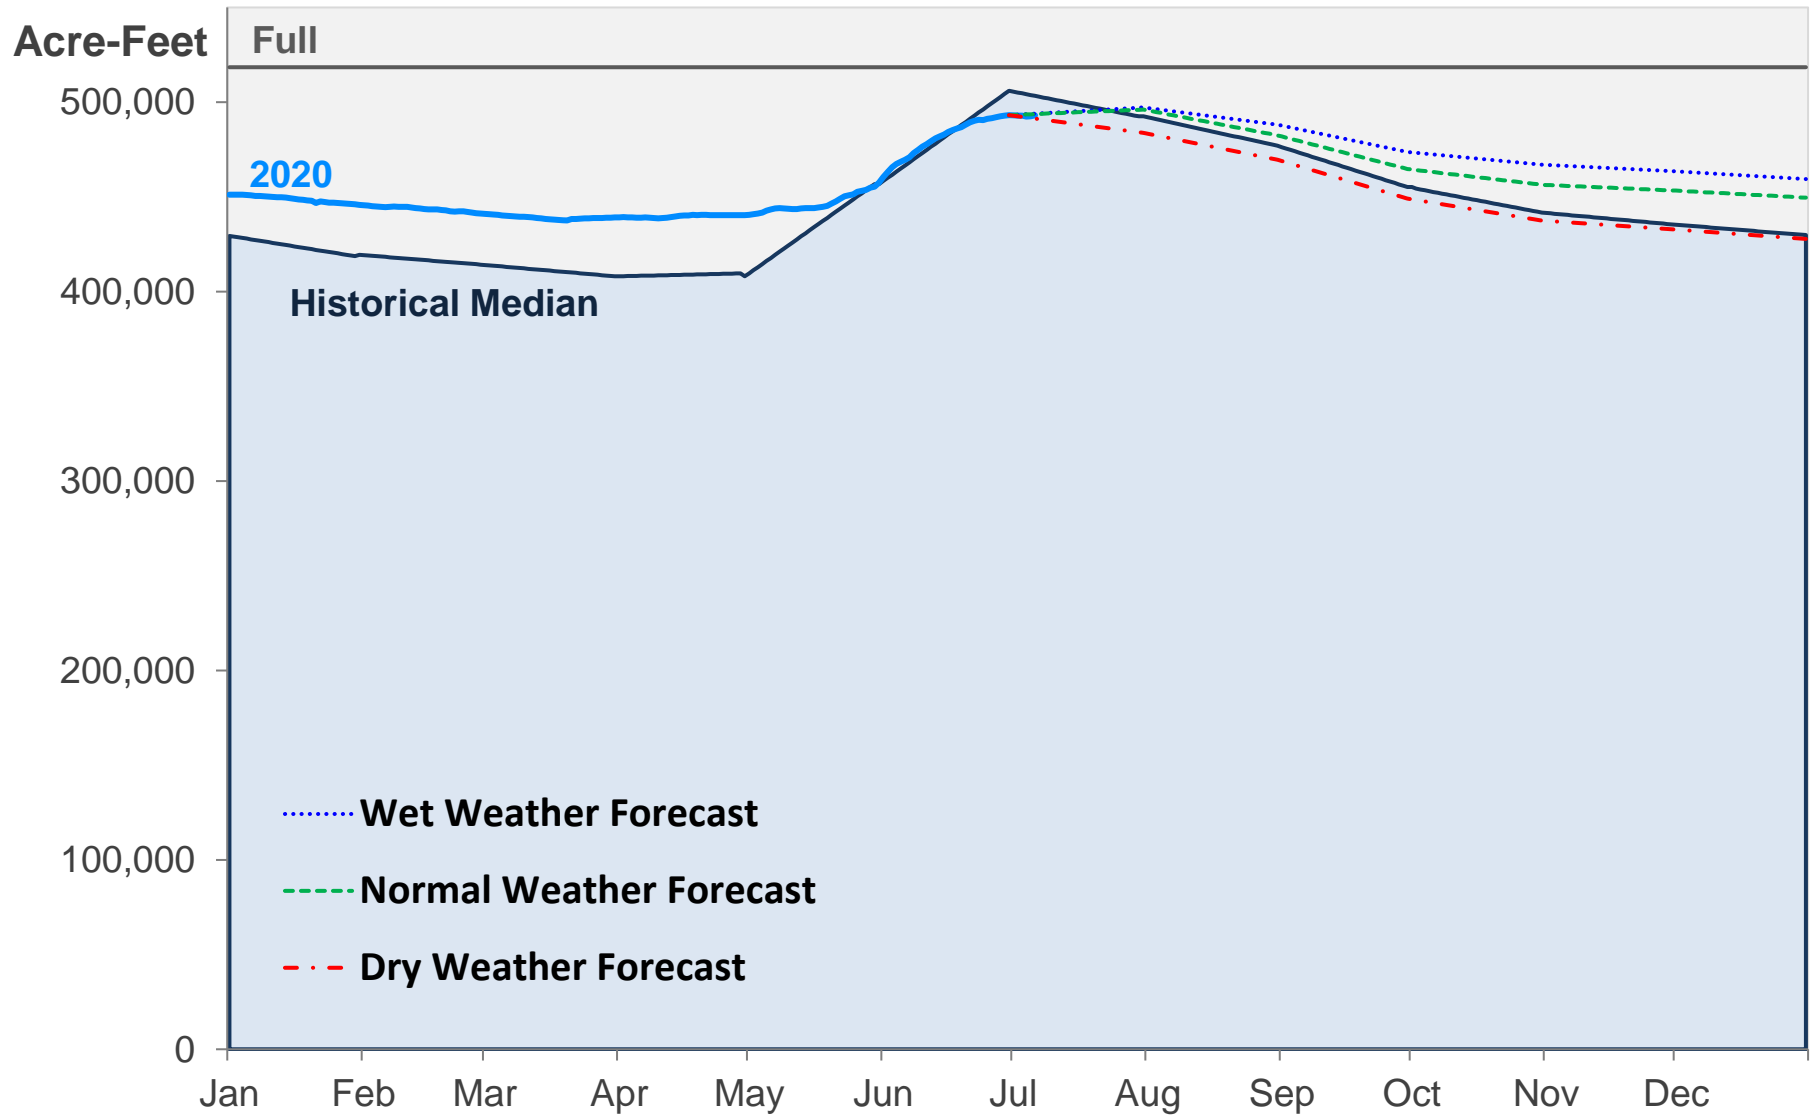

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Last Year	Historical Median	
	Total	Usable	Current			
Antero	19,881	19,826	19,716	99%	100%	100%
Eleven Mile	97,779	97,779	100,485	103%	106%	103%
Cheesman	79,064	79,064	65,822	83%	101%	99%
Marston	19,256	13,133	6,511	50%	87%	76%
Strontia Springs	7,863	7,163	6,570	92%	103%	95%
Chatfield	27,076	10,782	5,754	53%	102%	79%
Dillon	257,304	249,095	250,861	101%	99%	101%
Gross	41,811	29,811	29,539	99%	98%	98%
Ralston	10,776	7,276	5,627	77%	96%	93%
Meadow Creek	5,370	4,520	2,635	58%	98%	91%
Total	566,180	518,449	493,520	95%	100%	97%

Daily Use

July 6, 2020

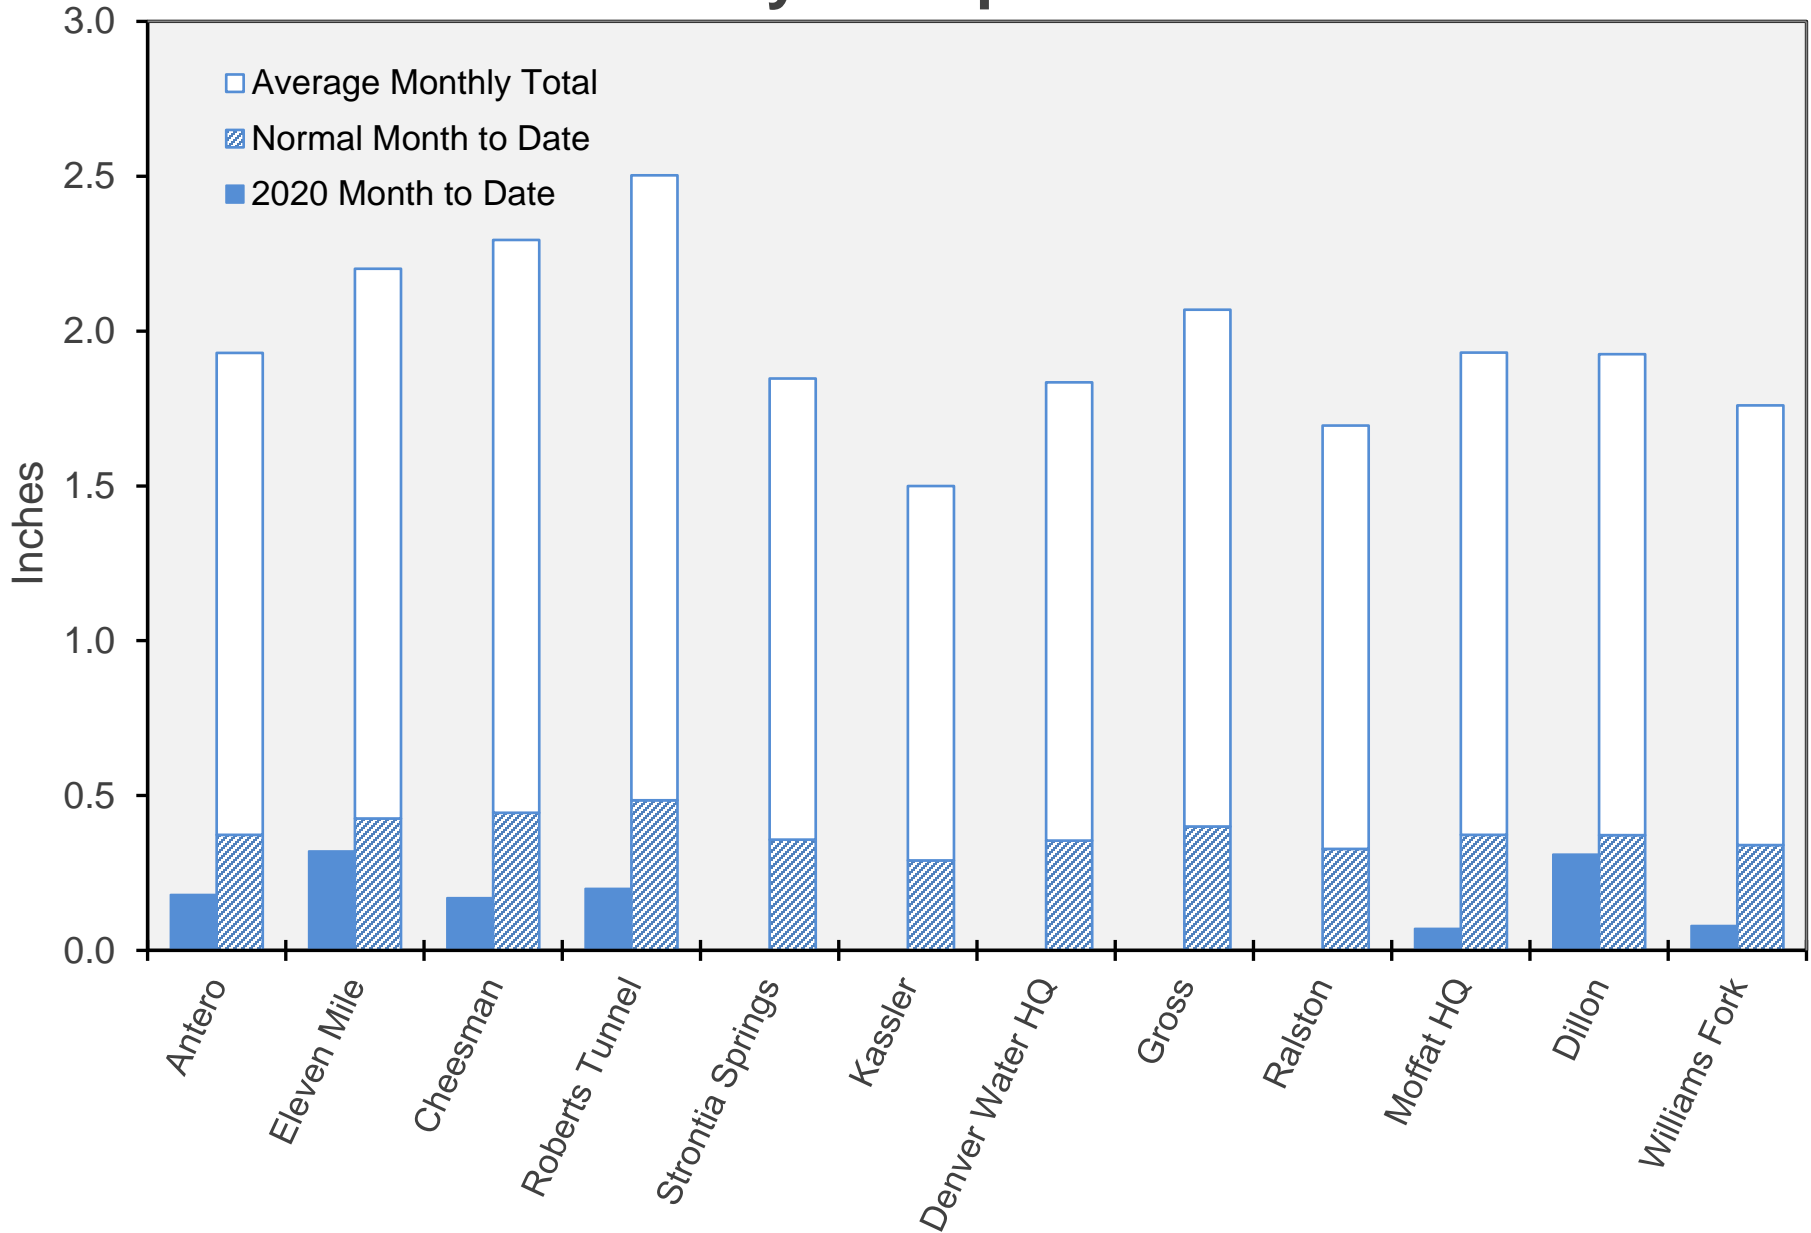

Supply Reservoir Contents

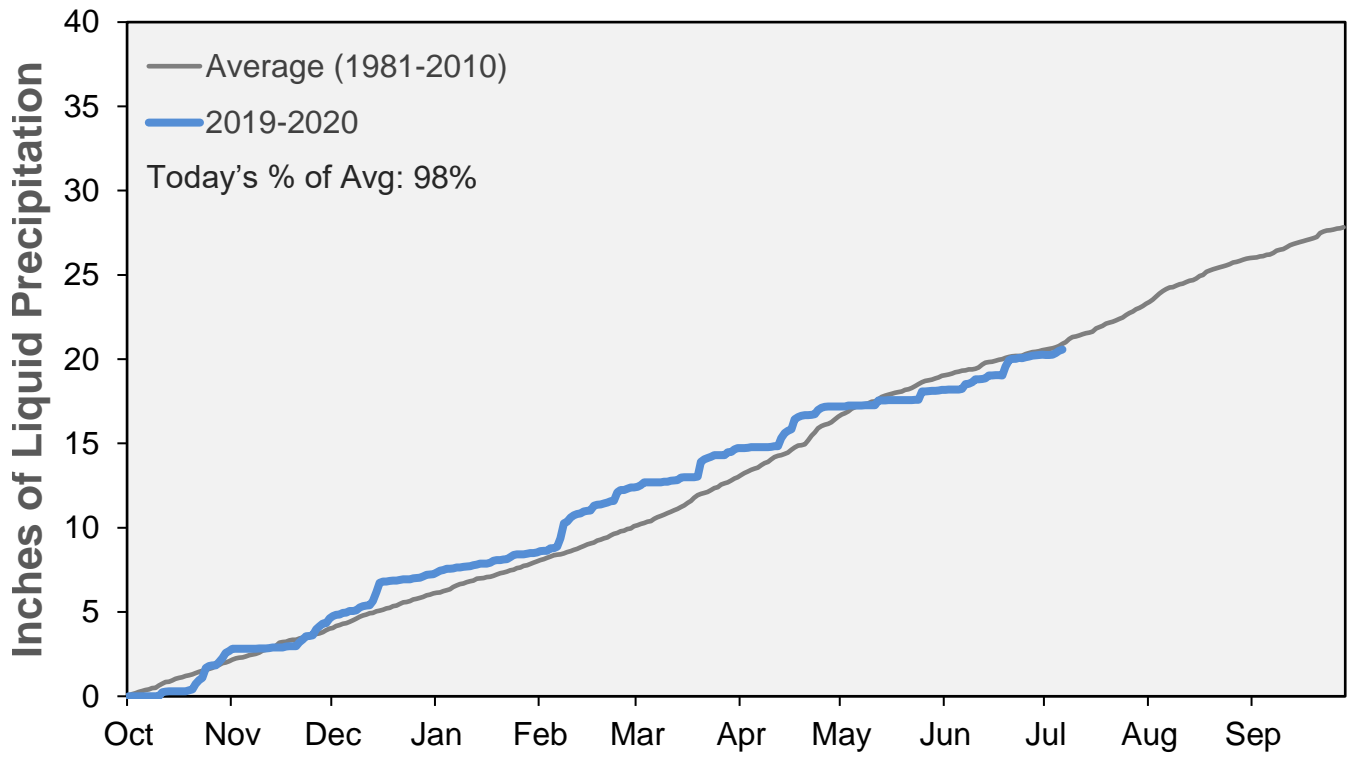

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

July 6, 2020

July Precipitation

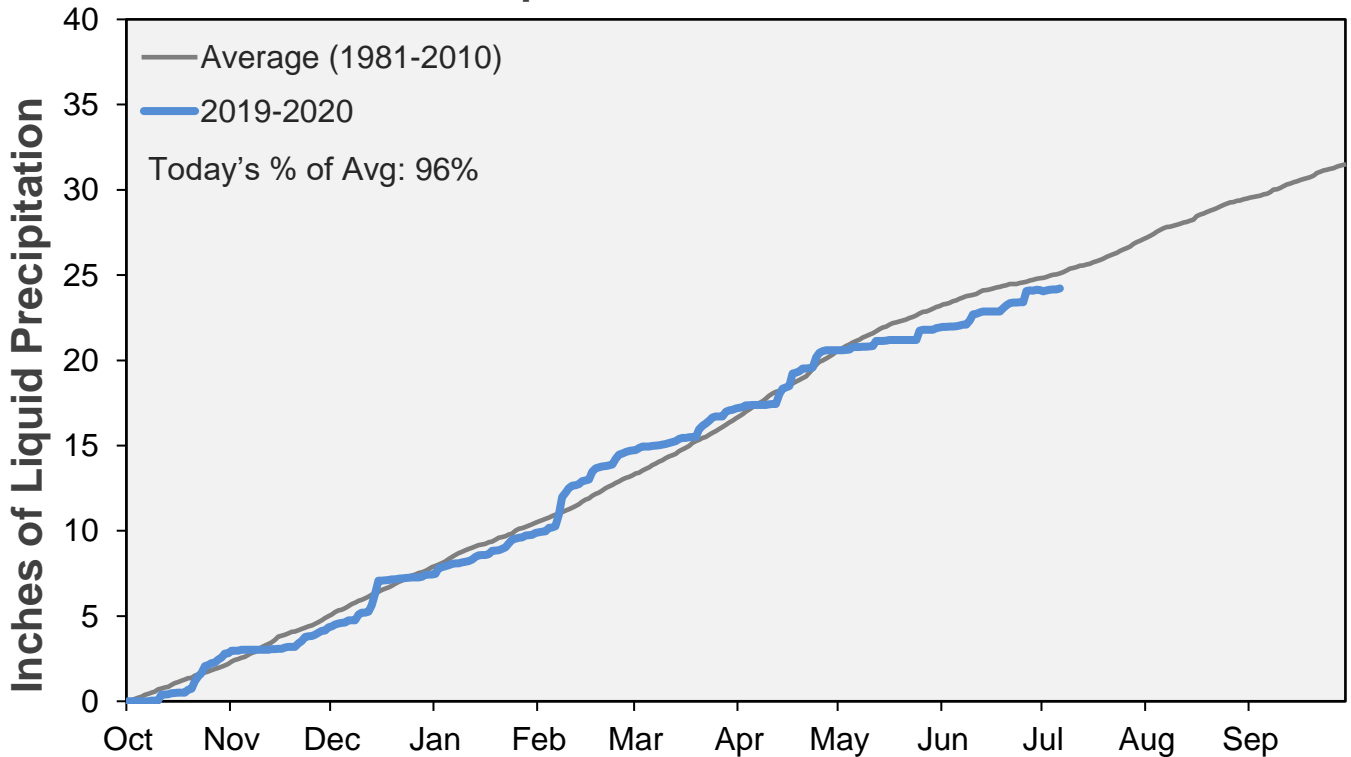

Cumulative Precipitation: South Platte River Watershed

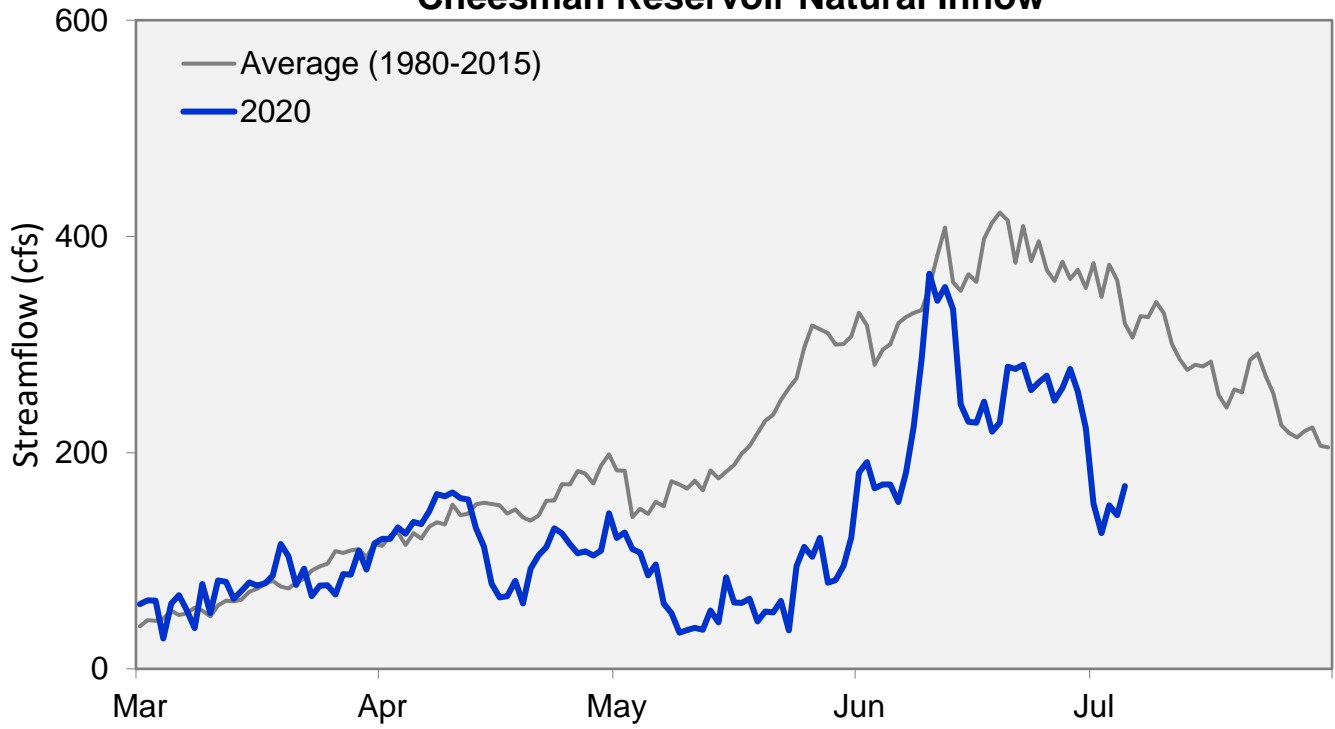

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

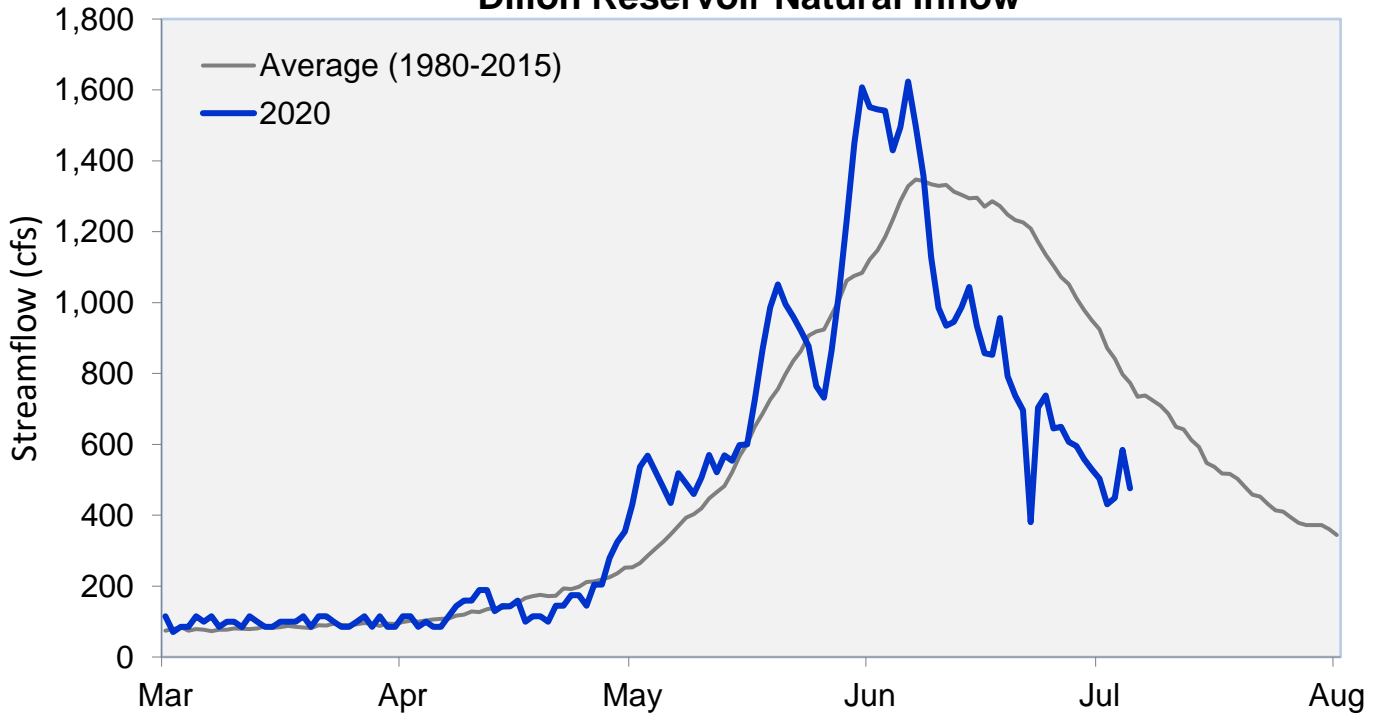

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

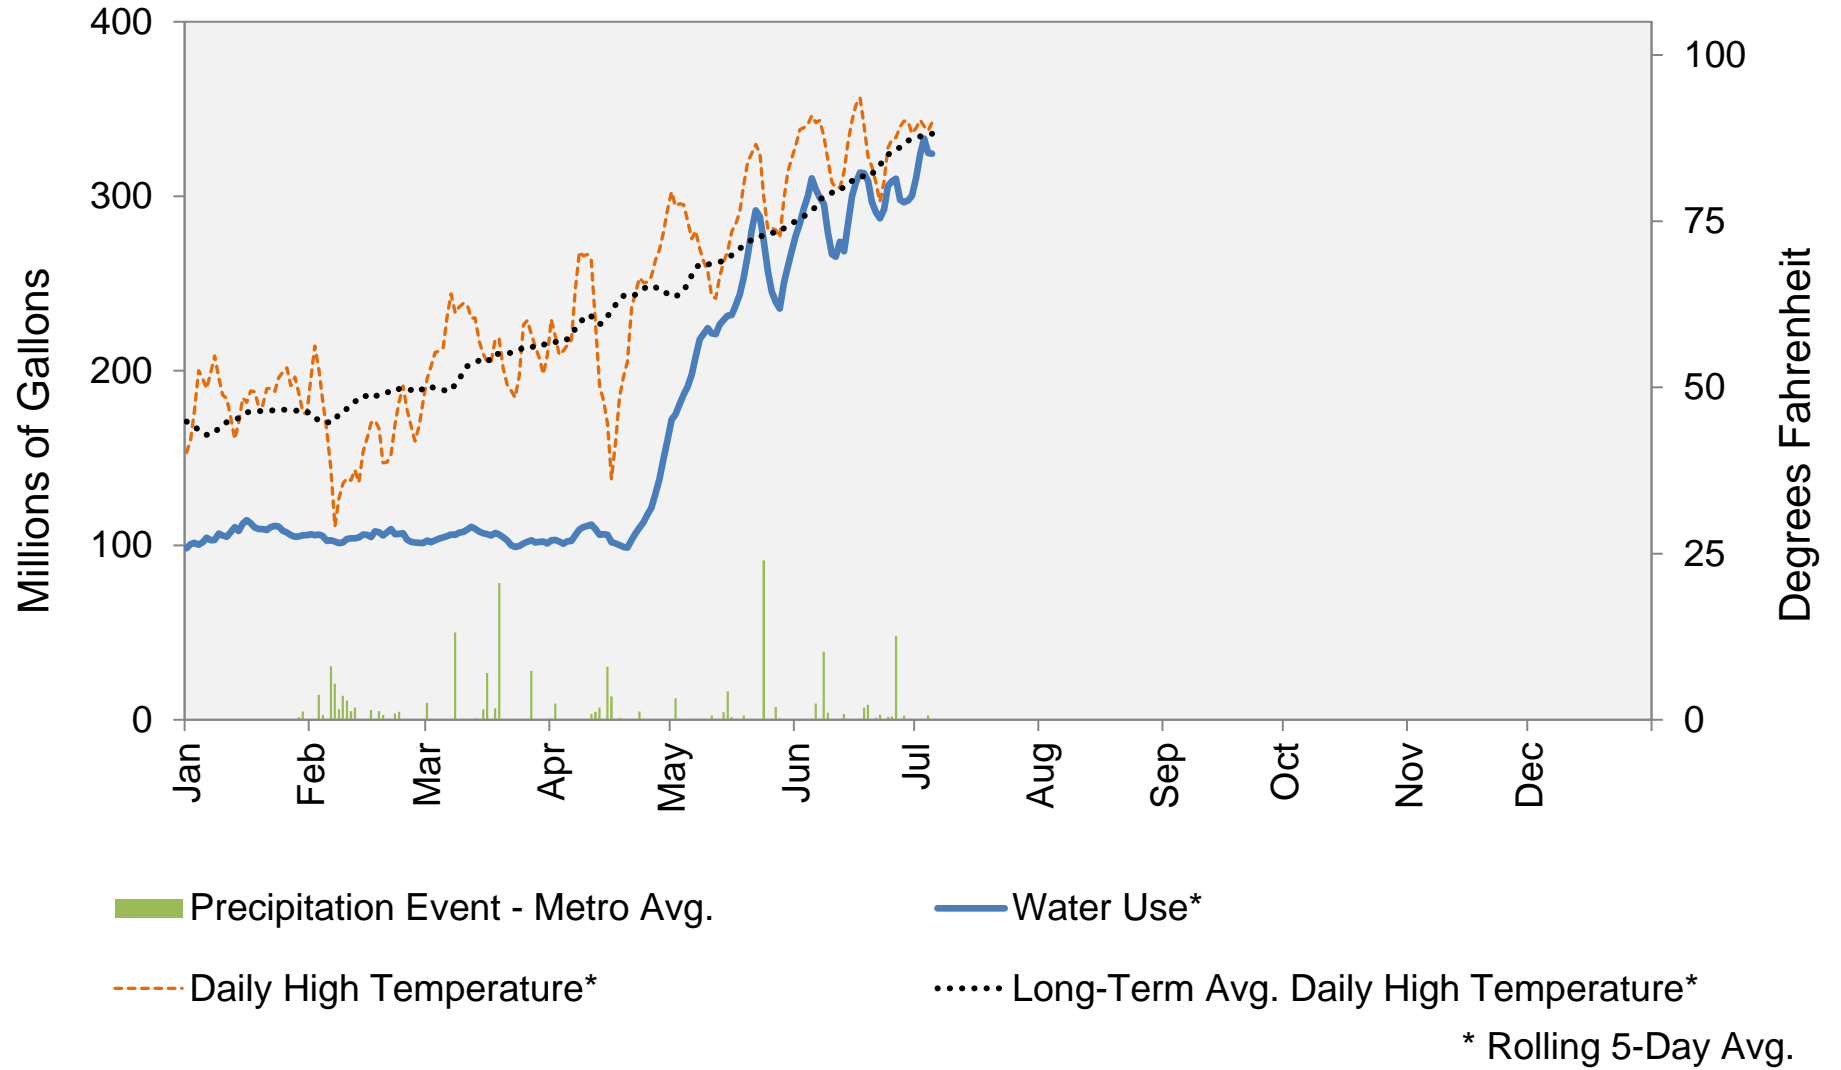

Cheesman Reservoir Natural Inflow

Dillon Reservoir Natural Inflow

2020 Water Use and Weather Conditions

July 6, 2020

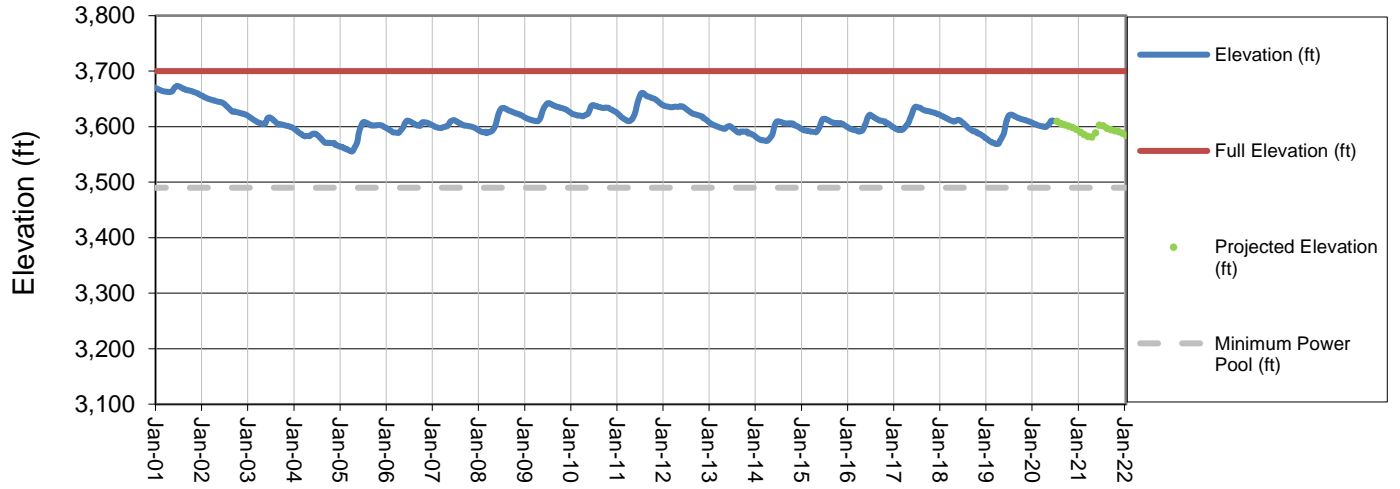

Denver Water Use and Reservoir Contents 2020

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)													
Actual End-of-Month Supply Reservoir Contents (AF)	445,828	441,137	439,113	440,306	457,594	493,141	496,100						
Actual % Full	86%	85%	85%	85%	88%	95%	96%						
Historical Median % Full	81%	80%	79%	79%	88%	98%							
2020 Expected Daily Use (MG)	110	109	108	127	172	272	298	282	248	150	109	105	154
Actual Daily Use (MG)	1	97	106	103	109	194	316	343

Monthly Average	107	104	104	116	239	297	324						166
% of 2020 Expected Daily Use	97%	96%	97%	91%	139%	109%	109%						108%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after April 1, 2020. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on April 6, 2020. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
