

WATER WATCH REPORT

October 19, 2020

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last	Historical
	Total	Usable	Year		Median	
Antero	19,881	19,826	18,859	95%	96%	99%
Eleven Mile	97,779	97,779	92,687	95%	102%	102%
Cheesman	79,064	79,064	34,038	43%	80%	83%
Marston	19,256	13,133	7,474	57%	71%	39%
Strontia Springs	7,863	7,163	6,494	91%	91%	93%
Chatfield	27,076	10,782	7,284	68%	43%	50%
Dillon	257,304	249,095	230,123	92%	92%	96%
Gross	41,811	29,811	15,815	53%	87%	73%
Ralston	10,776	7,276	4,821	66%	53%	63%
Meadow Creek	5,370	4,520	1,367	30%	0%	32%
Total	566,180	518,449	418,961	81%	89%	86%

Daily Use

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

October 19, 2020

October Precipitation

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

2020 Water Use and Weather Conditions

October 19, 2020

Denver Water Use and Reservoir Contents 2020													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	426,900												
Actual End-of-Month Supply Reservoir Contents (AF)	445,828	441,137	439,113	440,306	457,594	493,141	492,317	466,389	436,813

Monthly Average	107	104	104	116	239	297	333	337	260	233			213
% of 2020 Expected Daily Use	97%	96%	97%	91%	139%	109%	112%	119%	105%	155%			112%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after October 1, 2020. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on October 4, 2020. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
