

WATER WATCH REPORT

November 15, 2021

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Last Year	Historical Median	
	Total	Usable	Current			
Antero	19,881	19,826	19,692	99%	95%	100%
Eleven Mile	97,779	97,779	100,347	103%	94%	101%
Cheesman	79,064	79,064	75,361	95%	43%	82%
Marston	19,256	13,133	11,296	86%	68%	49%
Strontia Springs	7,863	7,163	6,386	89%	82%	92%
Chatfield	27,076	10,782	5,351	50%	69%	51%
Dillon	257,304	249,095	195,797	79%	90%	95%
Gross	41,811	29,811	23,326	78%	46%	65%
Ralston	10,776	7,276	0	0%	66%	63%
Meadow Creek	5,370	4,520	2,025	45%	28%	22%
Total	566,180	518,449	439,580	85%	79%	85%

Daily Use

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

November 15, 2021

November Precipitation

Snowpack: South Platte River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion

Snowpack: Colorado River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

November 15, 2021

Denver Water Use and Reservoir Contents 2021													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	437,500												
Actual End-of-Month Supply Reservoir Contents (AF)	402,356	397,848	395,709	401,929	451,143	505,599	503,679	484,584	456,539	438,777

Monthly Average	100	104	99	106	146	279	306	313	292	180	116		190
% of 2021 Expected Daily Use	91%	95%	93%	86%	91%	106%	100%	105%	106%	110%	105%		101%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after November 1, 2021. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on November 8, 2021. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

Colorado River above Lake Powell Snowpack

Data are from the 115 SNOTEL stations above Lake Powell.

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
