

WATER WATCH REPORT

January 24, 2022

Supply Reservoir Contents

Reservoir	Capacity (acre-feet)		Current Usable Contents (acre-feet)	Percent Full		
	Total	Usable		Current	Last Year	Historical Median
Antero	20,122	20,067	19,803	99%	96%	99%
Eleven Mile	97,779	97,779	99,006	101%	99%	102%
Cheesman	79,064	79,064	66,096	84%	51%	83%
Marston	19,108	13,133	10,203	78%	70%	54%
Strontia Springs	7,863	7,163	6,498	91%	82%	93%
Chatfield	27,076	10,782	9,325	86%	73%	86%
Dillon	257,304	249,095	191,376	77%	83%	91%
Gross	41,811	29,811	21,605	72%	38%	51%
Ralston	10,776	7,276	-	0%	66%	62%
Meadow Creek	5,370	4,520	3,043	67%	27%	14%
Total	566,273	518,690	426,956	82%	78%	81%

Daily Use

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

January Precipitation

Snowpack: South Platte River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion

Snowpack: Colorado River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

January 24, 2022

Denver Water Use and Reservoir Contents 2022

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	419,700												
Actual End-of-Month Supply Reservoir Contents (AF)													
Actual % Full													
Historical Median % Full	81%	80%	79%	79%	88%	98%	95%	92%	88%	85%	84%	83%

Monthly Average	99												99
% of 2022 Expected Daily Use	94%												94%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after January 3rd, 2022. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on January 3rd, 2022. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

Colorado River above Lake Powell Snowpack

Data are from the 115 SNOTEL stations above Lake Powell.

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
