

WATER WATCH REPORT

May 23, 2022

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Last Year	Historical Median	
	Total	Usable	Current			
Antero	20,122	20,067	19,738	98%	99%	100%
Eleven Mile	97,779	97,779	101,212	104%	99%	102%
Cheesman	79,064	79,064	59,348	75%	78%	92%
Marston	19,108	13,133	6,547	50%	80%	76%
Strontia Springs	7,863	7,163	6,300	88%	87%	94%
Chatfield	28,709	12,415	5,890	47%	87%	93%
Dillon	257,304	249,095	203,945	82%	83%	91%
Gross*	41,811	29,811	15,587	52%	28%	50%
Ralston	10,776	7,276	5,060	70%	54%	81%
Meadow Creek	5,370	4,520	3,043	67%	42%	31%
Total	567,906	520,323	426,669	82%	82%	86%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

May Precipitation

Snowpack: South Platte River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion

Snowpack: Colorado River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion

CUMULATIVE PRECIPITATION: SOUTH PLATTE RIVER WATERSHED

CUMULATIVE PRECIPITATION: COLORADO RIVER WATERSHED

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

Cheesman Reservoir Natural Inflow

Dillon Reservoir Natural Inflow

2022 Water Use and Weather Conditions

May 23, 2022

Denver Water Use and Reservoir Contents 2022

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	447,500												
Actual End-of-Month Supply Reservoir Contents (AF)	425,595	421,903	415,083	407,905									
Actual % Full	82%	81%	80%	79%									
Historical Median % Full	81%	80%	79%	79%	88%	98%	95%	92%	88%	85%	84%	83%	
2022 Expected Daily Use (MG)	105	104	102	120	157	257	298	292	270	158	105	101	115
Actual Daily Use (MG)	1	92	98	102	102	192

	31	91		101									
Monthly Average	99	101	98	134	226								126
% of 2022 Expected Daily Use	94%	97%	97%	112%	144%								110%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after May 2nd, 2022. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on May 2nd, 2022. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

Colorado River above Lake Powell Snowpack

Data are from the 115 SNOTEL stations above Lake Powell.

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
