

WATER WATCH REPORT

June 13, 2022

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last	Historical
	Total	Usable	Year		Median	
Antero	20,122	20,067	20,311	101%	99%	100%
Eleven Mile	97,779	97,779	99,692	102%	100%	102%
Cheesman	79,064	79,064	67,285	85%	89%	96%
Marston	19,108	13,133	7,716	59%	76%	77%
Strontia Springs	7,863	7,163	6,432	90%	81%	94%
Chatfield	28,709	12,415	3,279	26%	86%	88%
Dillon	257,304	249,095	229,190	92%	95%	97%
Gross*	41,811	29,811	15,580	52%	93%	77%
Ralston	10,776	7,276	6,603	91%	58%	89%
Meadow Creek	5,370	4,520	4,695	104%	88%	61%
Total	567,906	520,323	460,784	89%	94%	92%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

Acre-Feet

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

June Precipitation

Snowpack: South Platte River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion

Snowpack: Colorado River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion

CUMULATIVE PRECIPITATION: SOUTH PLATTE RIVER WATERSHED

CUMULATIVE PRECIPITATION: COLORADO RIVER WATERSHED

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

Cheesman Reservoir Natural Inflow

Dillon Reservoir Natural Inflow

2022 Water Use and Weather Conditions

June 13, 2022

Denver Water Use and Reservoir Contents 2022													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	471,000												
Actual End-of-Month Supply Reservoir Contents (AF)	425,595	421,903	415,083	407,905	438,115								
Actual % Full	82%	81%	80%	79%	85%								
Historical Median % Full	81%	80%	79%	79%	88%	98%	95%	92%	88%	85%	84%	83%	
2022 Expected Daily Use (MG)	105	104	102	120	157	257	298	292	270	158	105	101	128
Actual Daily Use (MG)	1	92	98	102	102	192	182						
	2	100	95	101	102	169	186

	31	91		101		208							
Monthly Average	99	101	98	134	223	247							140
% of 2022 Expected Daily Use	94%	97%	97%	112%	142%	96%							109%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after June 6th, 2022. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on June 6th, 2022. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

Colorado River above Lake Powell Snowpack

Data are from the 115 SNOTEL stations above Lake Powell.

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
