

WATER WATCH REPORT

June 6, 2022

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last	Historical
	Total	Usable	Year		Median	
Antero	20,122	20,067	20,503	102%	99%	100%
Eleven Mile	97,779	97,779	100,312	103%	99%	102%
Cheesman	79,064	79,064	65,246	83%	87%	94%
Marston	19,108	13,133	7,772	59%	84%	78%
Strontia Springs	7,863	7,163	6,233	87%	79%	94%
Chatfield	28,709	12,415	3,560	29%	87%	90%
Dillon	257,304	249,095	216,533	87%	91%	95%
Gross*	41,811	29,811	15,976	54%	77%	68%
Ralston	10,776	7,276	6,674	92%	56%	87%
Meadow Creek	5,370	4,520	4,247	94%	75%	48%
Total	567,906	520,323	447,057	86%	90%	90%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

Acre-Feet

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

June 6, 2022

June Precipitation

Snowpack: South Platte River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion

Snowpack: Colorado River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion

CUMULATIVE PRECIPITATION: SOUTH PLATTE RIVER WATERSHED

CUMULATIVE PRECIPITATION: COLORADO RIVER WATERSHED

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

Monthly Average	99	101	98	134	223	211							134
% of 2022 Expected Daily Use	94%	97%	97%	112%	142%	82%							110%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after June 6th, 2022. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on June 6th, 2022. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

Colorado River above Lake Powell Snowpack

Data are from the 115 SNOTEL stations above Lake Powell.

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
