

WATER WATCH REPORT

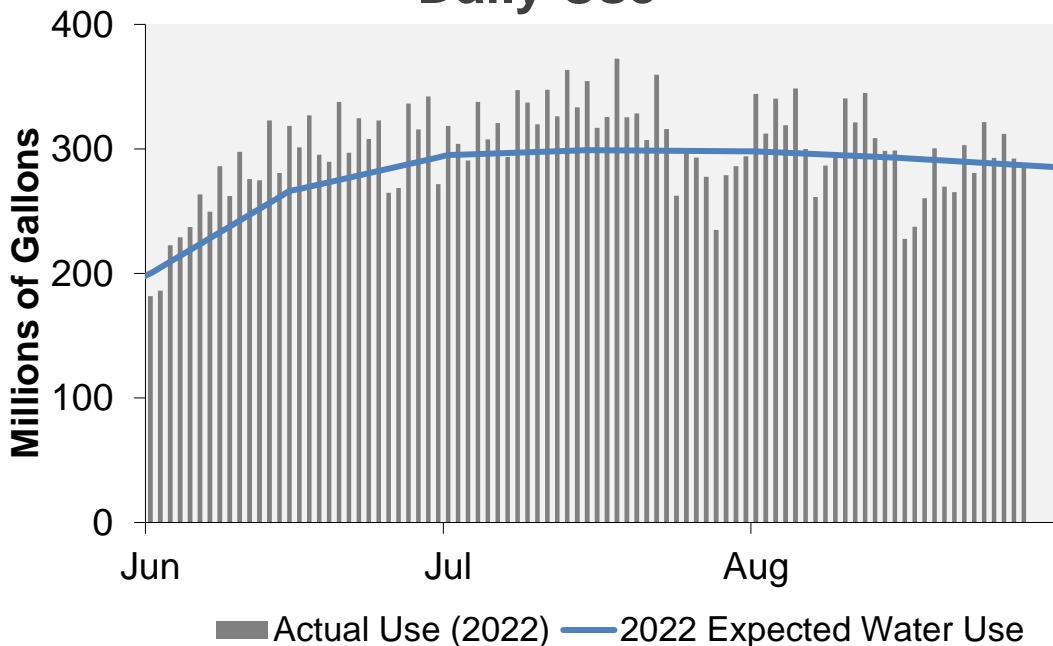

August 29, 2022

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Last Year	Historical Median	
	Total	Usable	Current			
Antero	20,122	20,067	20,021	100%	98%	100%
Eleven Mile	97,779	97,779	100,519	103%	103%	102%
Cheesman	79,064	79,064	78,193	99%	98%	94%
Marston	19,108	13,133	9,338	71%	83%	61%
Strontia Springs	7,863	7,163	6,166	86%	85%	93%
Chatfield	28,709	12,415	1,453	12%	25%	55%
Dillon	257,304	249,095	226,028	91%	96%	98%
Gross*	41,811	29,811	16,039	54%	87%	83%
Ralston	10,776	7,276	6,141	84%	30%	86%
Meadow Creek	5,370	4,520	3,613	80%	52%	75%
Total	567,906	520,323	467,511	90%	93%	92%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

August 29, 2022

August Precipitation

CUMULATIVE PRECIPITATION: SOUTH PLATTE RIVER

CUMULATIVE PRECIPITATION: COLORADO RIVER WATERSHED

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

2022 Water Use and Weather Conditions

August 29, 2022

Denver Water Use and Reservoir Contents 2022													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	462,400												
Actual End-of-Month Supply Reservoir Contents (AF)	425,595	421,903	415,083	407,905	438,115	474,473	472,785

Monthly Average	99	101	98	134	223	283	315	299					194
% of 2022 Expected Daily Use	94%	97%	97%	112%	142%	110%	106%	102%					108%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after August 1st, 2022. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on August 8th, 2022. 6) Daily water figures are subject to change.

Lake Powell Report*

Lake Powell Elevation (2001-Current)

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
