

## WATER WATCH REPORT

January 22, 2024

### Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last Year	Historical Median
	Total	Usable				
Antero	20,122	20,067	19,955	99%	98%	99%
Eleven Mile	97,779	97,779	99,246	102%	102%	102%
Cheesman	79,064	79,064	70,002	89%	88%	83%
Marston	19,108	13,133	9,413	72%	55%	54%
Strontia Springs	7,863	7,163	5,864	82%	88%	93%
Chatfield	28,709	12,415	12,173	98%	63%	84%
Dillon	257,304	249,095	211,968	85%	82%	91%
Gross*	41,811	29,811	5,451	18%	36%	51%
Ralston	10,776	7,276	5,400	74%	51%	63%
Meadow Creek	5,370	4,520	-	0%	3%	14%
<b>Total</b>	<b>567,906</b>	<b>520,323</b>	<b>439,473</b>	<b>84%</b>	<b>82%</b>	<b>81%</b>

\*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

### Daily Use

# Supply Reservoir Contents

Acre-Feet

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

# January Precipitation

### Snowpack: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

### Snowpack: Colorado River Watershed

Data are from the 9 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

### Cumulative Precipitation: South Platte River

### Cumulative Precipitation: Colorado River

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

January 22, 2024

Denver Water Use and Reservoir Contents 2024													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	441,900												
Actual End-of-Month Supply Reservoir Contents (AF)													
Actual % Full													
Historical Median % Full	81%	80%	79%	79%	88%	98%	95%	92%	88%	85%	84%	83%

Monthly Average	109												109
% of 2023 Expected Daily Use	104%												104%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather January 8<sup>th</sup>, 2024. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on January 8<sup>th</sup>, 2024. 6) Daily water figures are subject to change.

# Lake Powell Report\*

## Colorado River Above Lake Powell Snowpack

## Lake Powell Elevation (2001-Current)

\* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
