

WATER WATCH REPORT

July 1, 2024

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last Year	Historical Median
	Total	Usable	Year		Median	
Antero	20,122	20,067	19,868	99%	99%	100%
Eleven Mile	97,779	97,779	102,464	105%	102%	103%
Cheesman	79,064	79,064	79,344	100%	100%	99%
Marston	19,108	13,133	9,760	74%	71%	76%
Strontia Springs	7,863	7,163	7,306	102%	90%	95%
Chatfield	28,709	12,415	10,745	87%	100%	80%
Dillon	257,304	249,095	251,717	101%	102%	101%
Gross*	41,811	29,811	16,134	54%	54%	98%
Ralston	10,776	7,276	7,028	97%	96%	93%
Meadow Creek	5,370	4,520	4,566	101%	101%	91%
Total	567,906	520,323	508,932	98%	97%	98%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

Acre-Feet

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

July 1, 2024

June Precipitation

Cumulative Precipitation: South Platte River

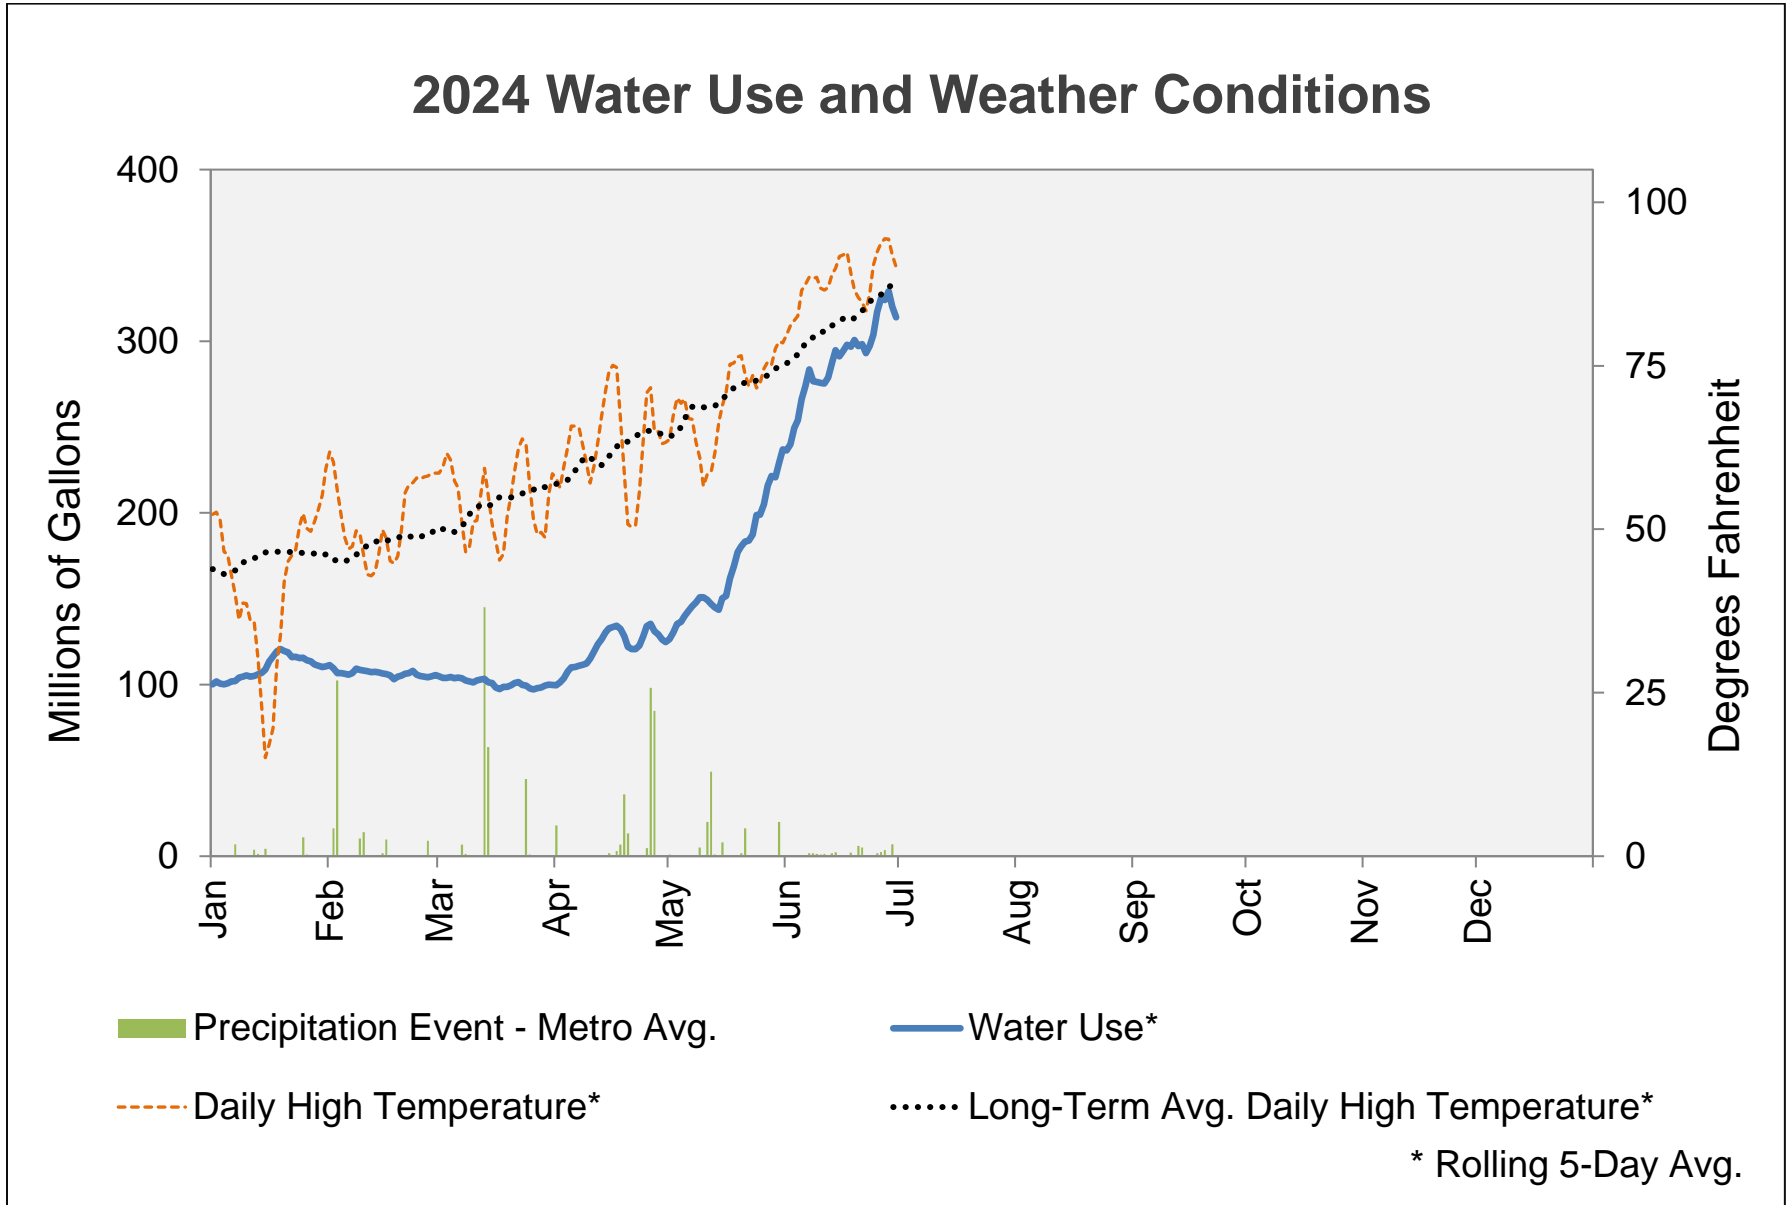

Cumulative Precipitation: Colorado River

July 1, 2024

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after July 1st, 2024. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on July 1st, 2024. 6) Daily water figures are subject to change.

Lake Powell Report*

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
