

WATER WATCH REPORT

August 5, 2024

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last	Historical
	Total	Usable	Year		Median	
Antero	20,122	20,067	19,305	96%	100%	100%
Eleven Mile	97,779	97,779	100,727	103%	102%	103%
Cheesman	79,064	79,064	75,957	96%	98%	98%
Marston	19,108	13,133	10,247	78%	73%	74%
Strontia Springs	7,863	7,163	6,395	89%	80%	94%
Chatfield	28,709	12,415	6,664	54%	98%	71%
Dillon	257,304	249,095	245,671	99%	101%	100%
Gross*	41,811	29,811	14,403	48%	53%	92%
Ralston	10,776	7,276	6,738	93%	88%	90%
Meadow Creek	5,370	4,520	3,695	82%	89%	85%
Total	567,906	520,323	489,802	94%	96%	95%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

August Precipitation

Cumulative Precipitation: South Platte River

Cumulative Precipitation: Colorado River

% of 2024 Expected Daily Use	105%	101%	97%	103%	93%	110%	106%	112%					103%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after August 5th, 2024. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on August 5th, 2024. 6) Daily water figures are subject to change.

Lake Powell Report*

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
