

WATER WATCH REPORT

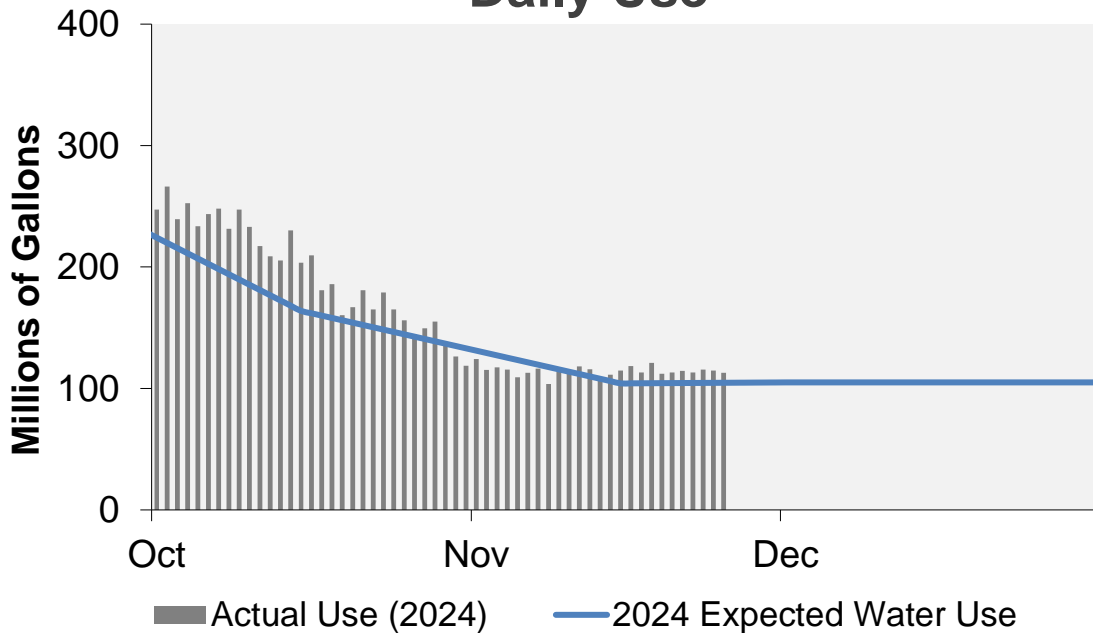

December 2, 2024

Supply Reservoir Contents

Reservoir	Capacity		Current Usable Contents (acre-feet)	Percent Full		
	(acre-feet)			Current	Last Year	Historical Median
	Total	Usable				
Antero	20,122	20,067	18,250	91%	97%	100%
Eleven Mile	97,779	97,779	100,105	102%	102%	102%
Cheesman	79,064	79,064	73,025	92%	94%	82%
Marston	19,108	13,133	11,003	84%	76%	64%
Strontia Springs	7,863	7,163	6,159	86%	82%	92%
Chatfield	28,709	12,415	7,561	61%	93%	51%
Dillon	257,304	249,095	204,545	82%	86%	94%
Gross*	41,811	29,811	8,030	27%	29%	60%
Ralston	10,776	7,276	6,477	89%	77%	68%
Meadow Creek	5,370	4,520	-	0%	0%	19%
Total	567,906	520,323	435,155	84%	86%	84%

*Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

Daily Use

Supply Reservoir Contents

Acre-Feet

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities. The percent full figures are based on the normal usable capacity of 29,811 acre feet.

December Precipitation

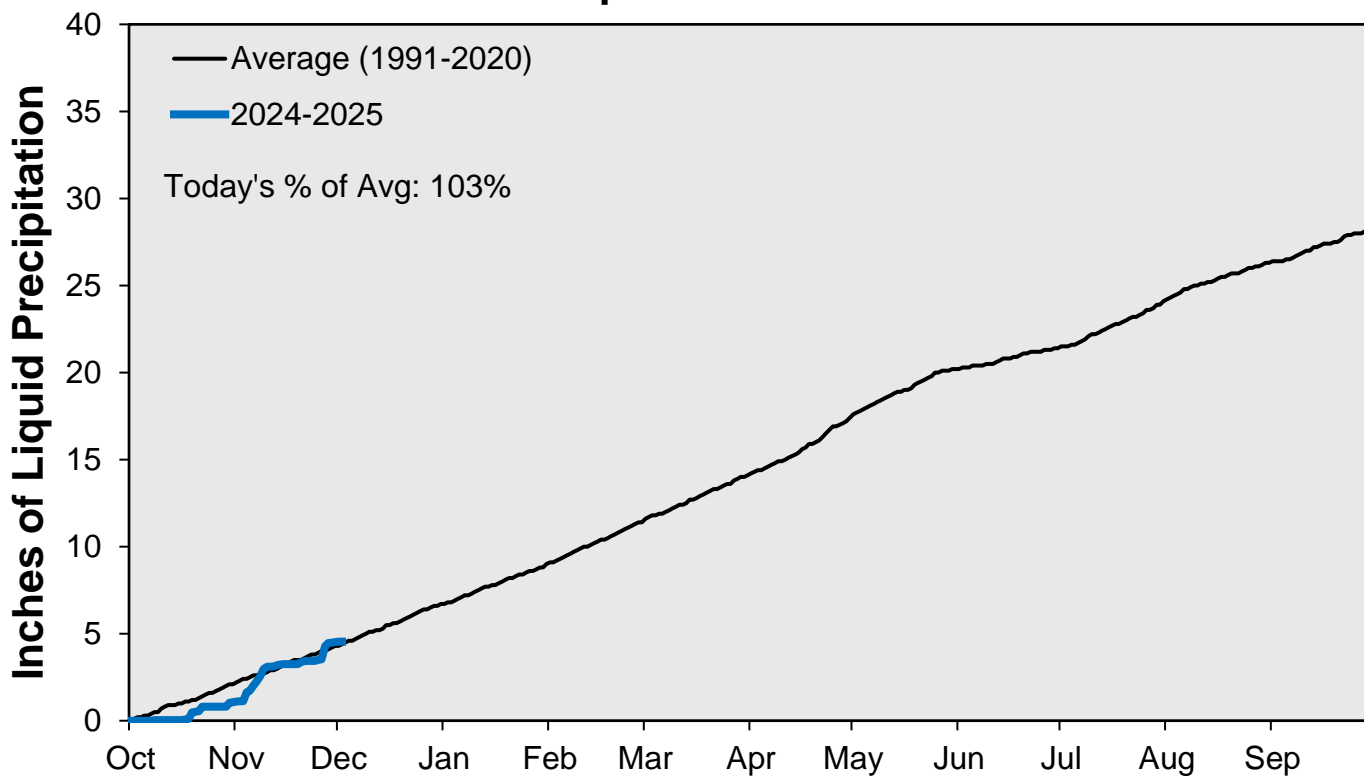

Snowpack: South Platte River Watershed

Snowpack: Colorado River Watershed

Cumulative Precipitation: South Platte River

Cumulative Precipitation: Colorado River

2024 Water Use and Weather Conditions

December 2, 2024

Denver Water Use and Reservoir Contents 2024													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 520,323 AF)												434,300

% of 2024 Expected Daily Use	105%	101%	97%	103%	93%	110%	106%	98%	98%	115%	103%		103%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after December 2nd, 2024. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on December 2nd, 2024. 6) Daily water figures are subject to change.

Lake Powell Report*

Colorado River Above Lake Powell Snowpack

Lake Powell Elevation (2001-Current)

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
