Ralston	6,879	8,923	10,776	63	83	72
Strontia Springs	7,123	7,247	7,863	90	92	90
TOTAL	454,900	474,464	569,539	80	83	85

Note: *Gross Reservoir storage is limited to 29,938 acre feet in total storage during construction activities.

Daily Use – Actual vs. Expected

Total Supply Reservoir Contents and Forecasts

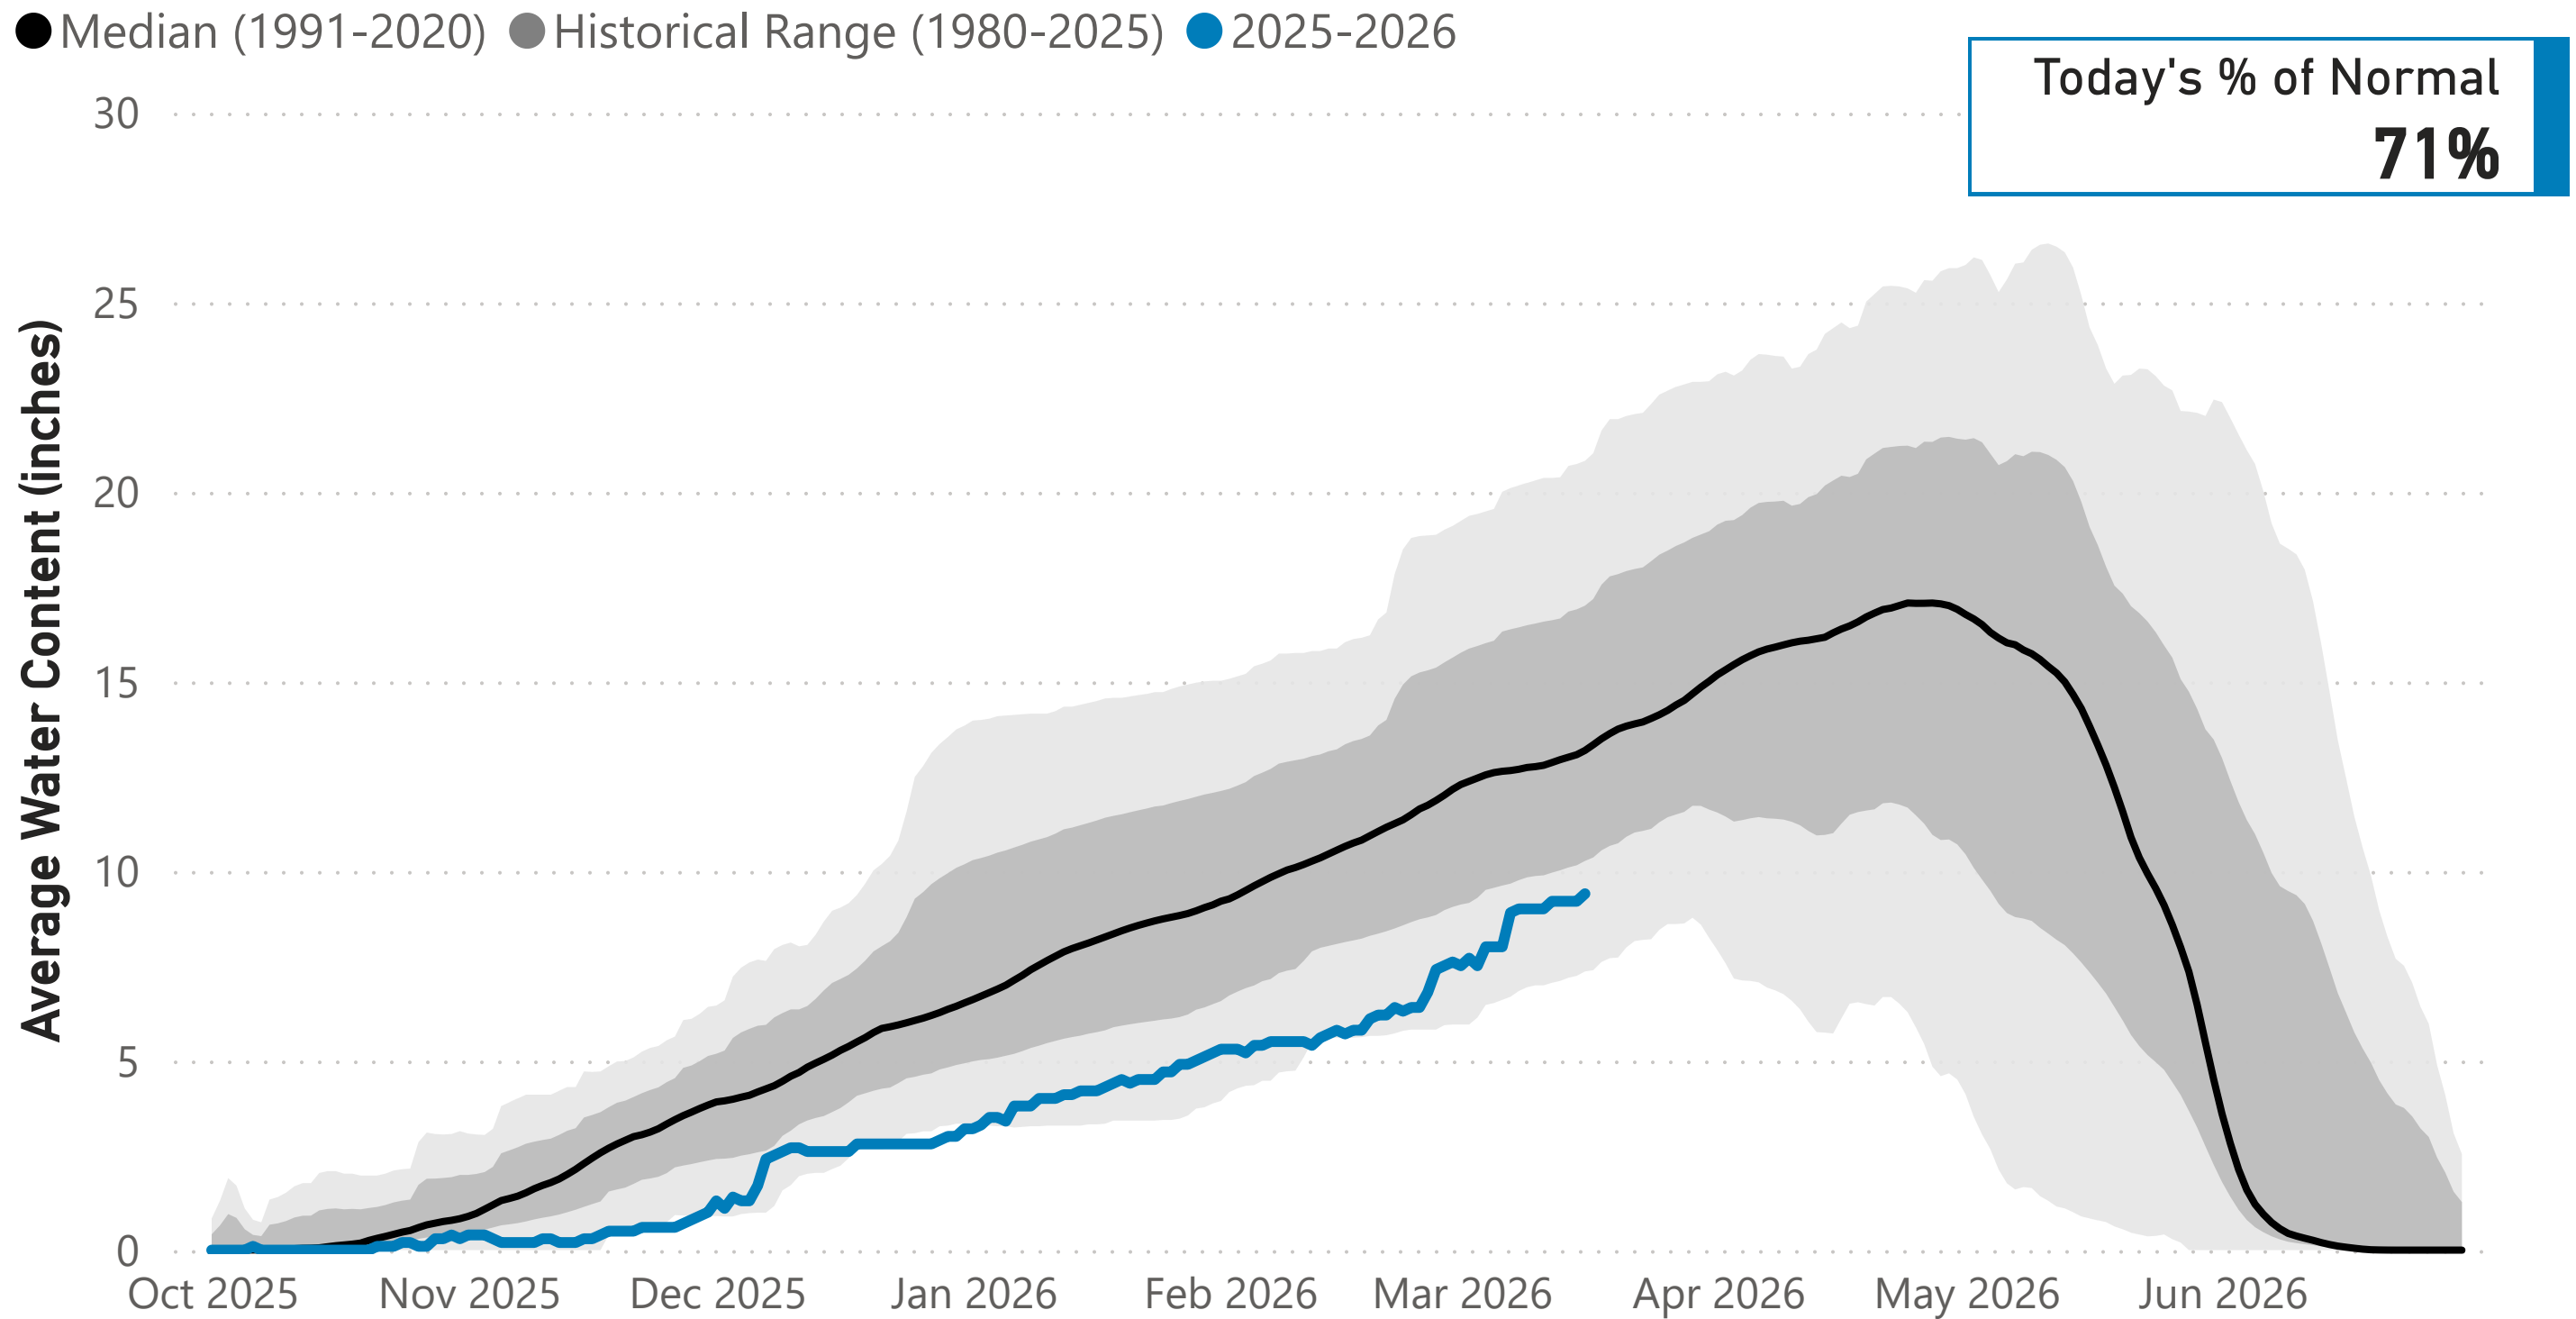

Notes: 1) Total system supply reservoir contents are shown in acre-feet (AF). 2) The solid blue line represents actual 2026 storage to date. 3) The dotted lines represent the **most probable forecast, wet conditions, and dry conditions** based on current conditions.

2026 Denver Water Daily Use Heatmap

													YTD-Avg
% of Expected Daily Use	107	110	109										109
Expected Daily Use	109	109	109	120	175	261	300	288	263	170	114	107	109
Monthly Average	117	120	119										119

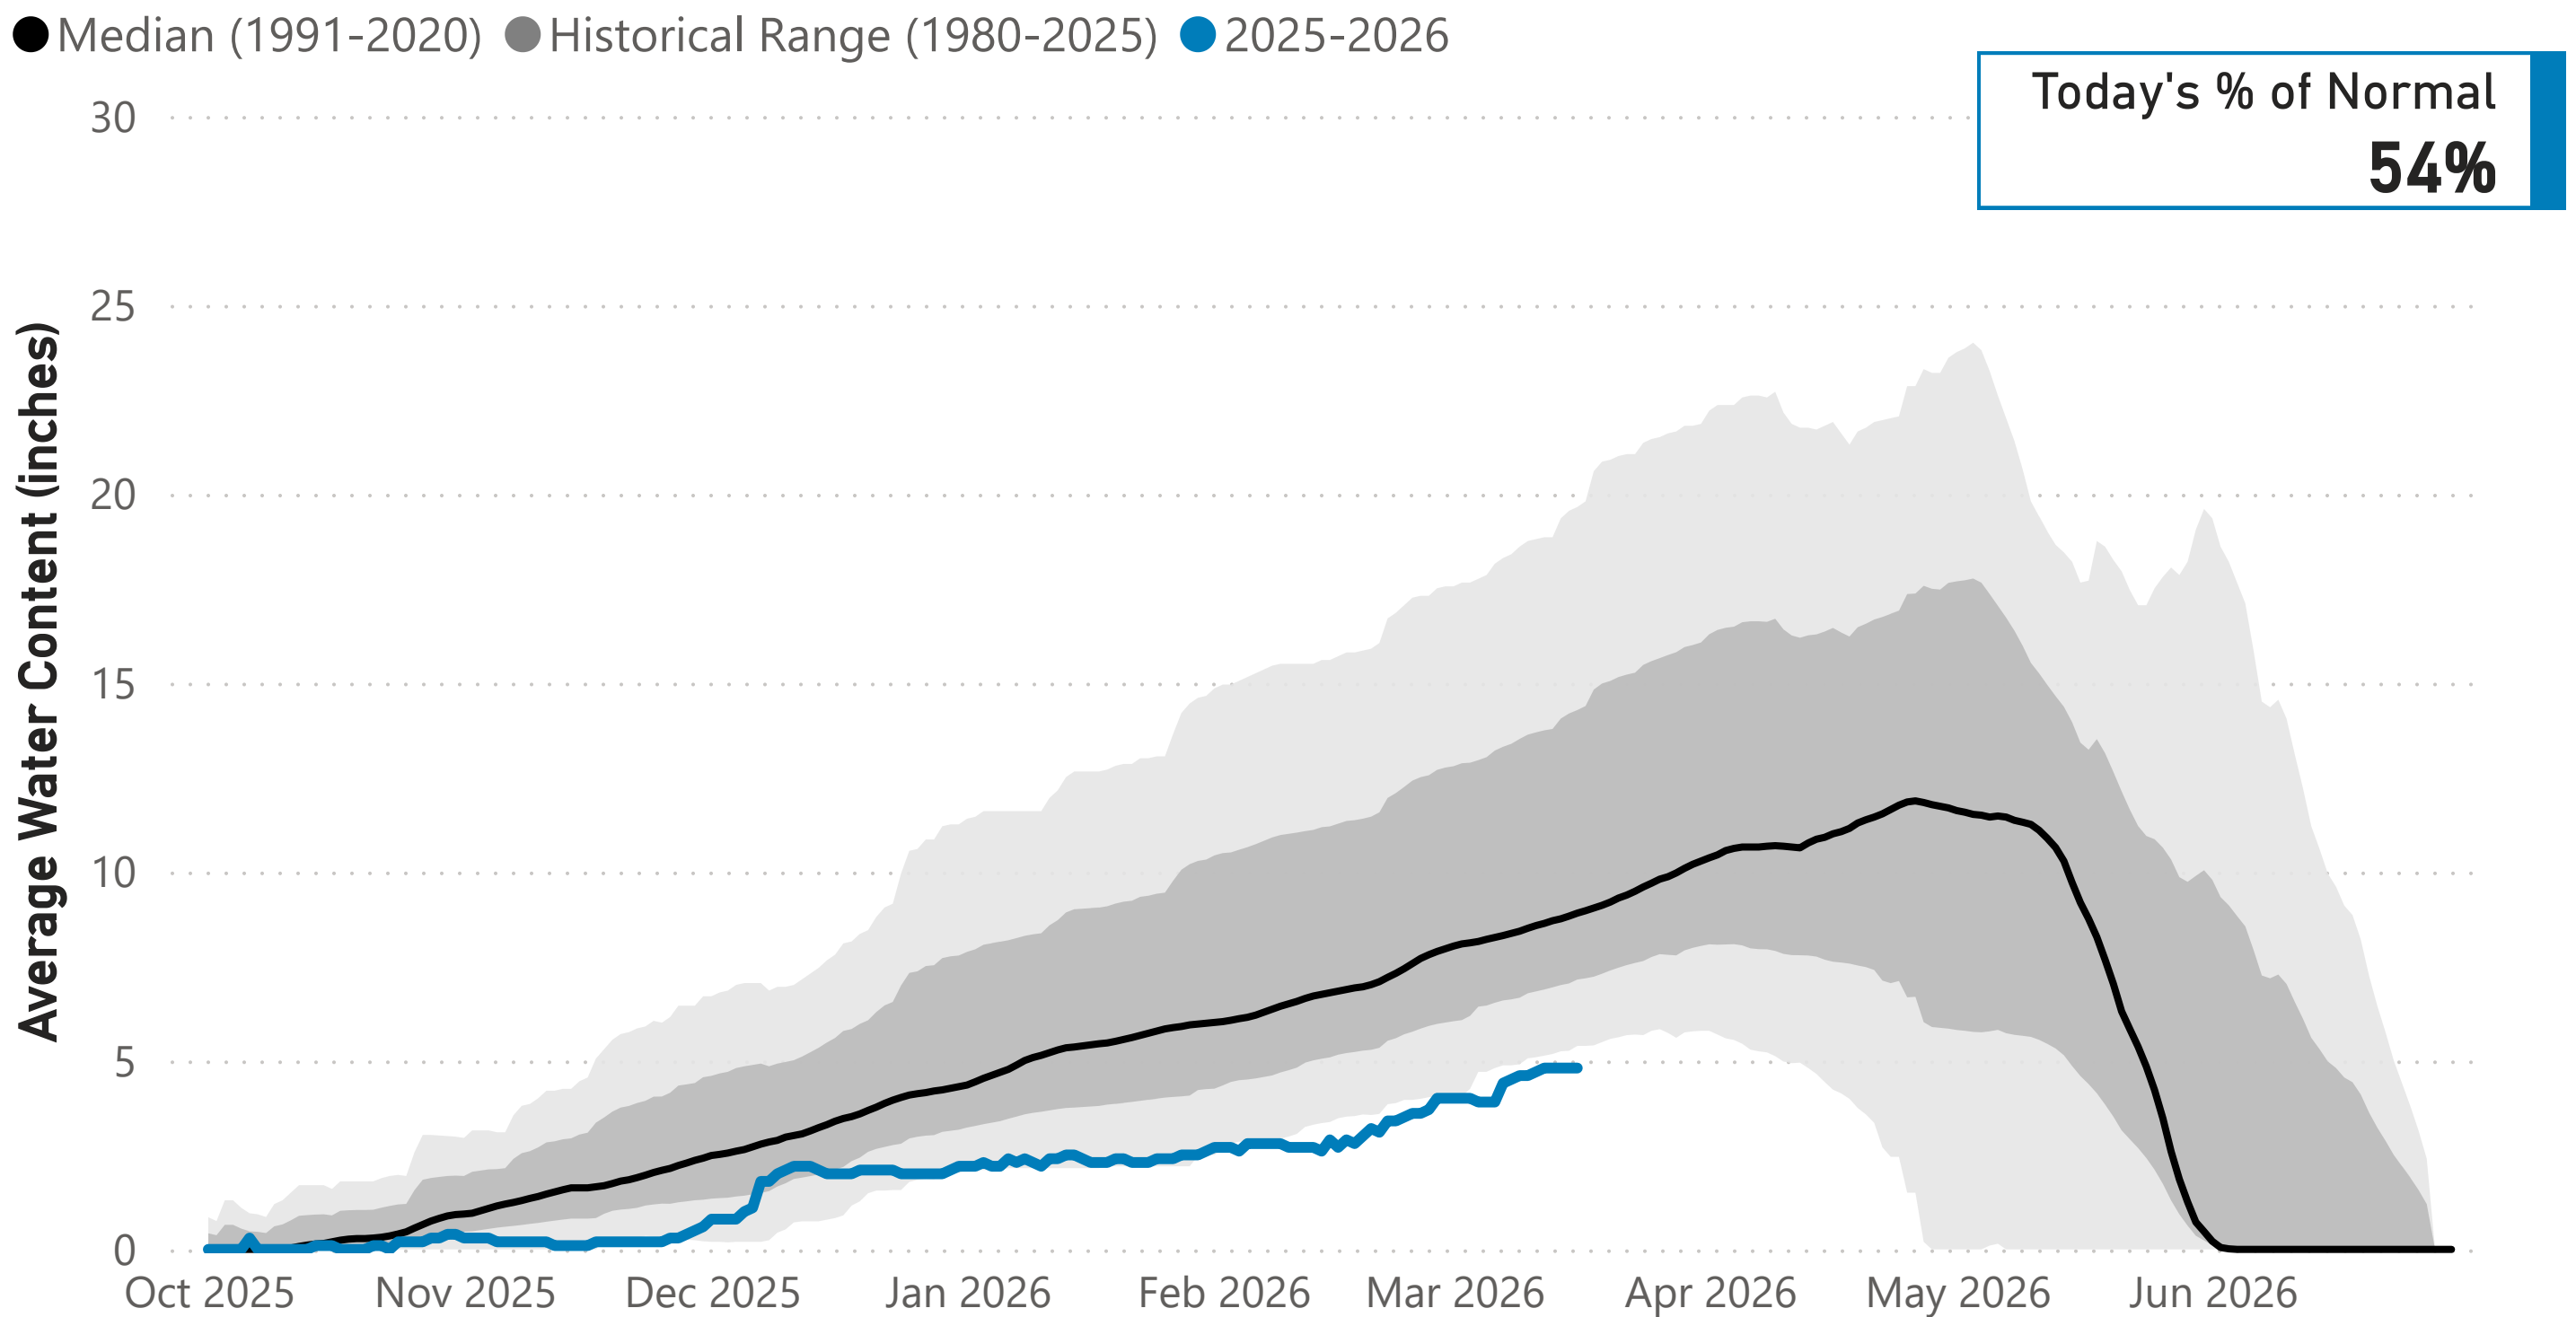

Notes: 1) Values are in million gallons (MG). 2) Expected Daily Use is based on historical use with normal weather conditions. 3) Cell colors represent deviations from **daily** expected use: **white** = expected, **red** = above expected, **blue** = below expected. 4) Values are daily totals by calendar day and month 2026.

Snowpack: Colorado River Watershed

Data are from the 9 SNOTEL stations above Denver Water's Upper Colorado River diversion facilities.

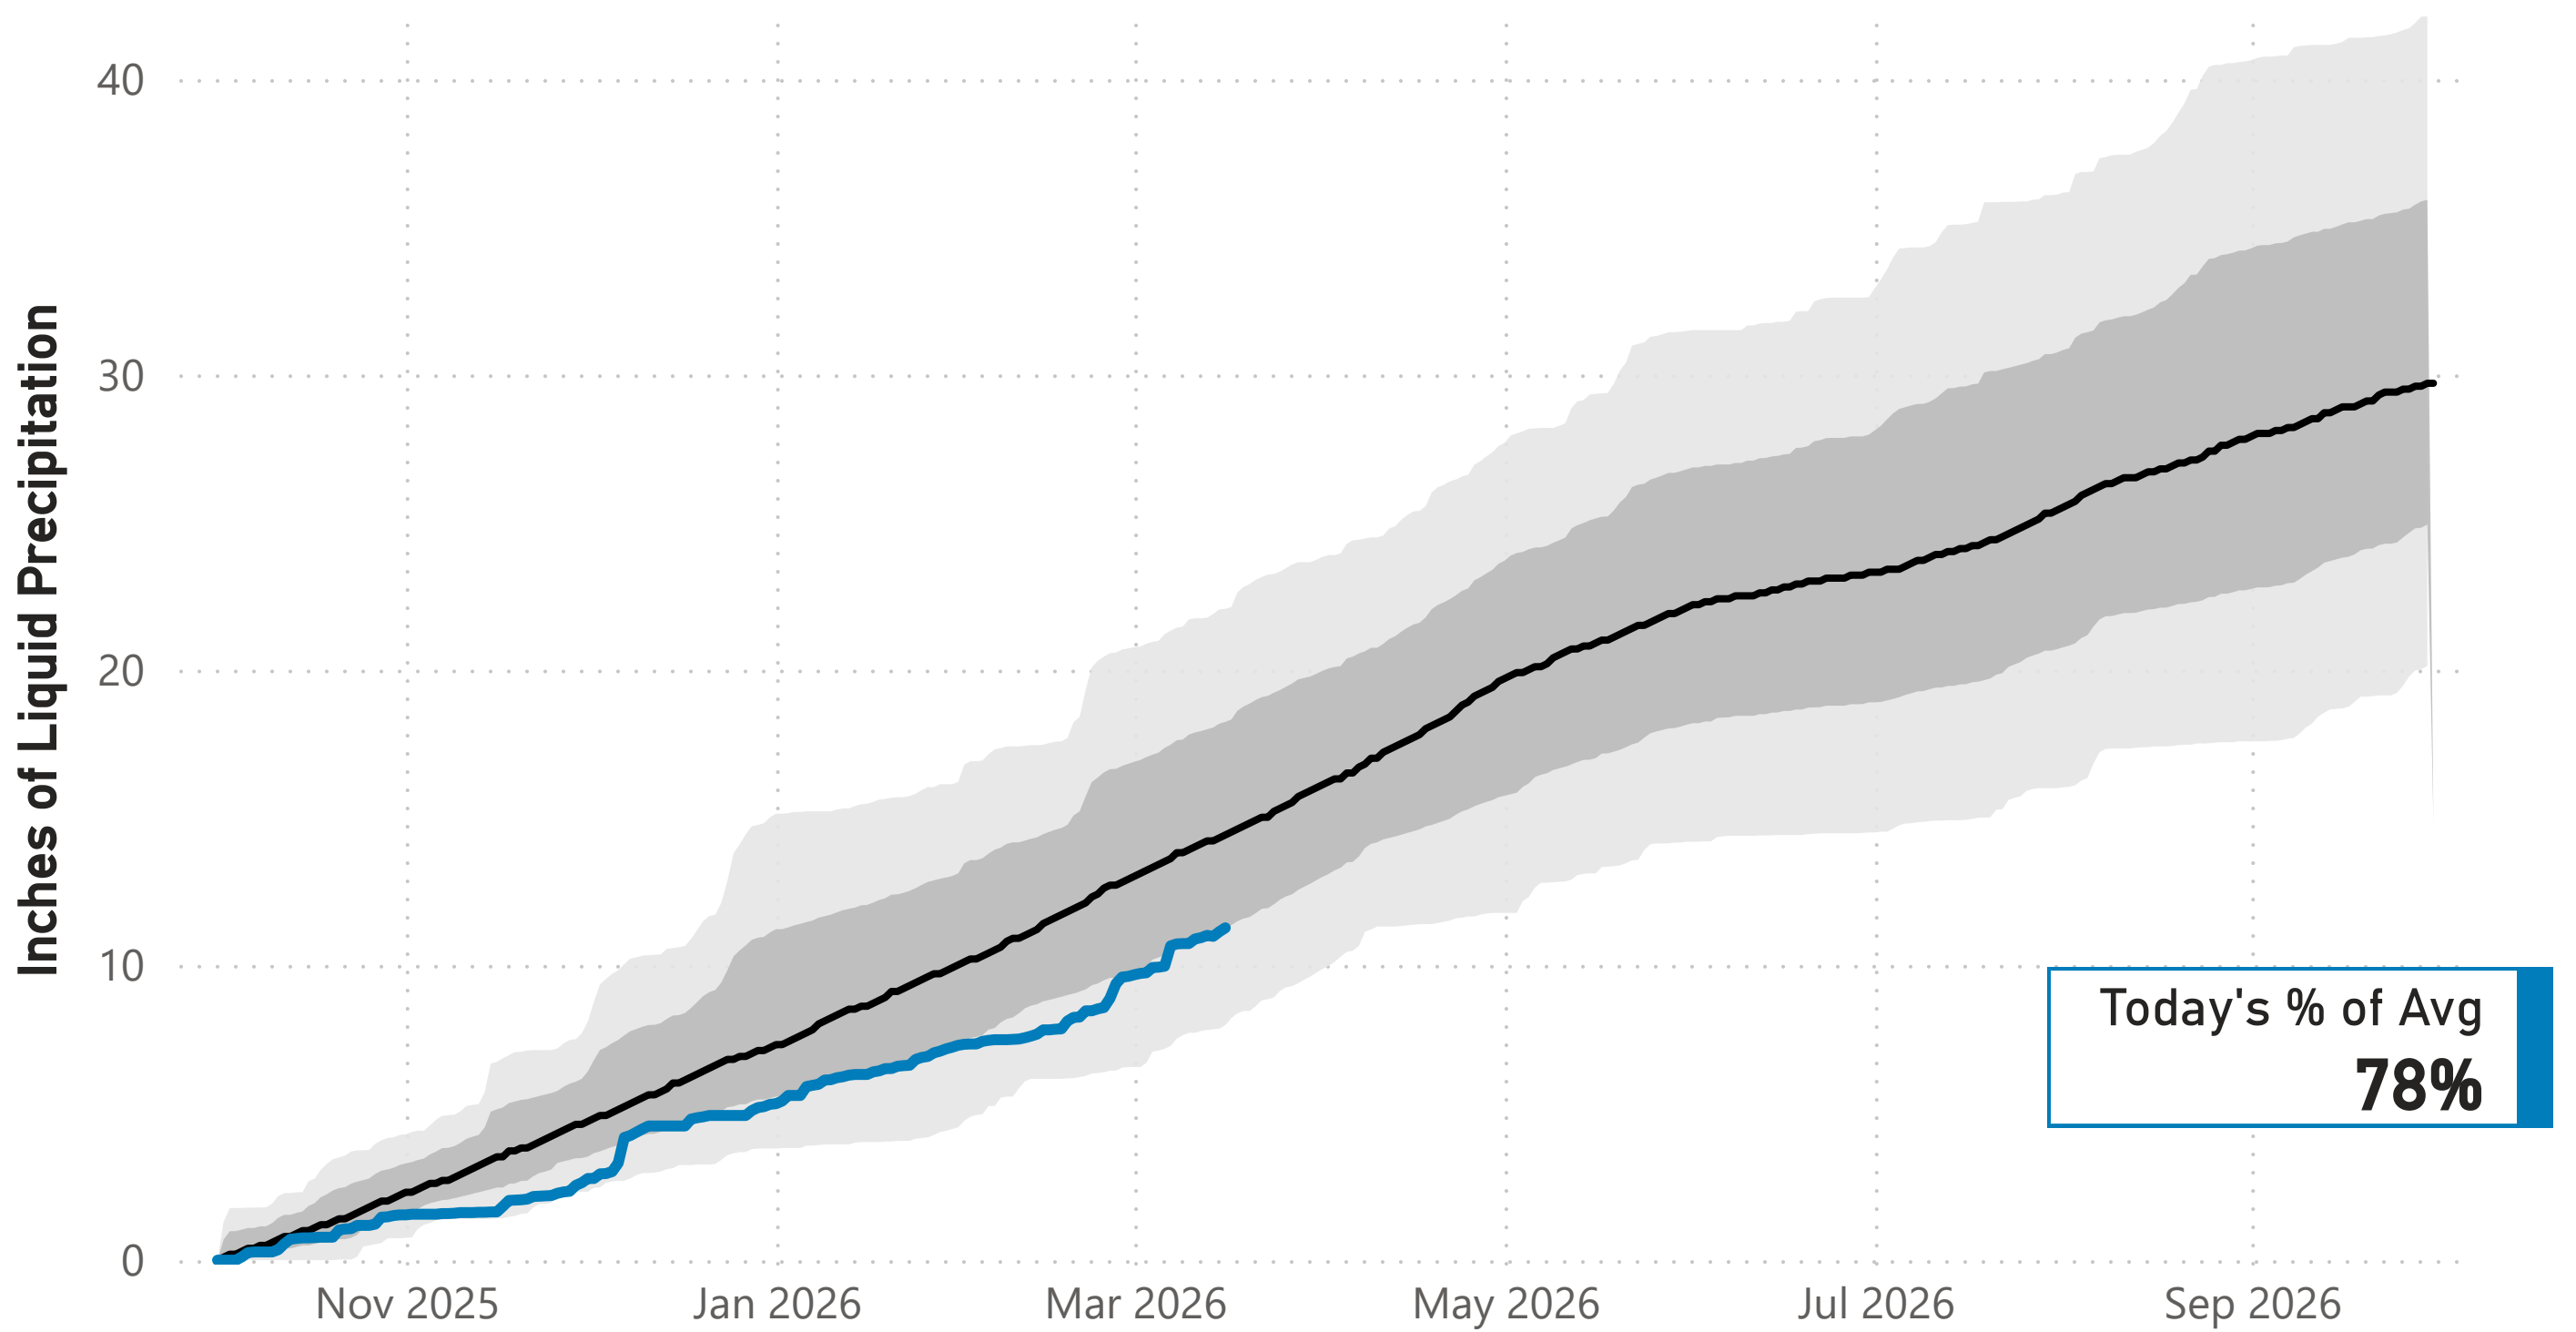

Snowpack: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

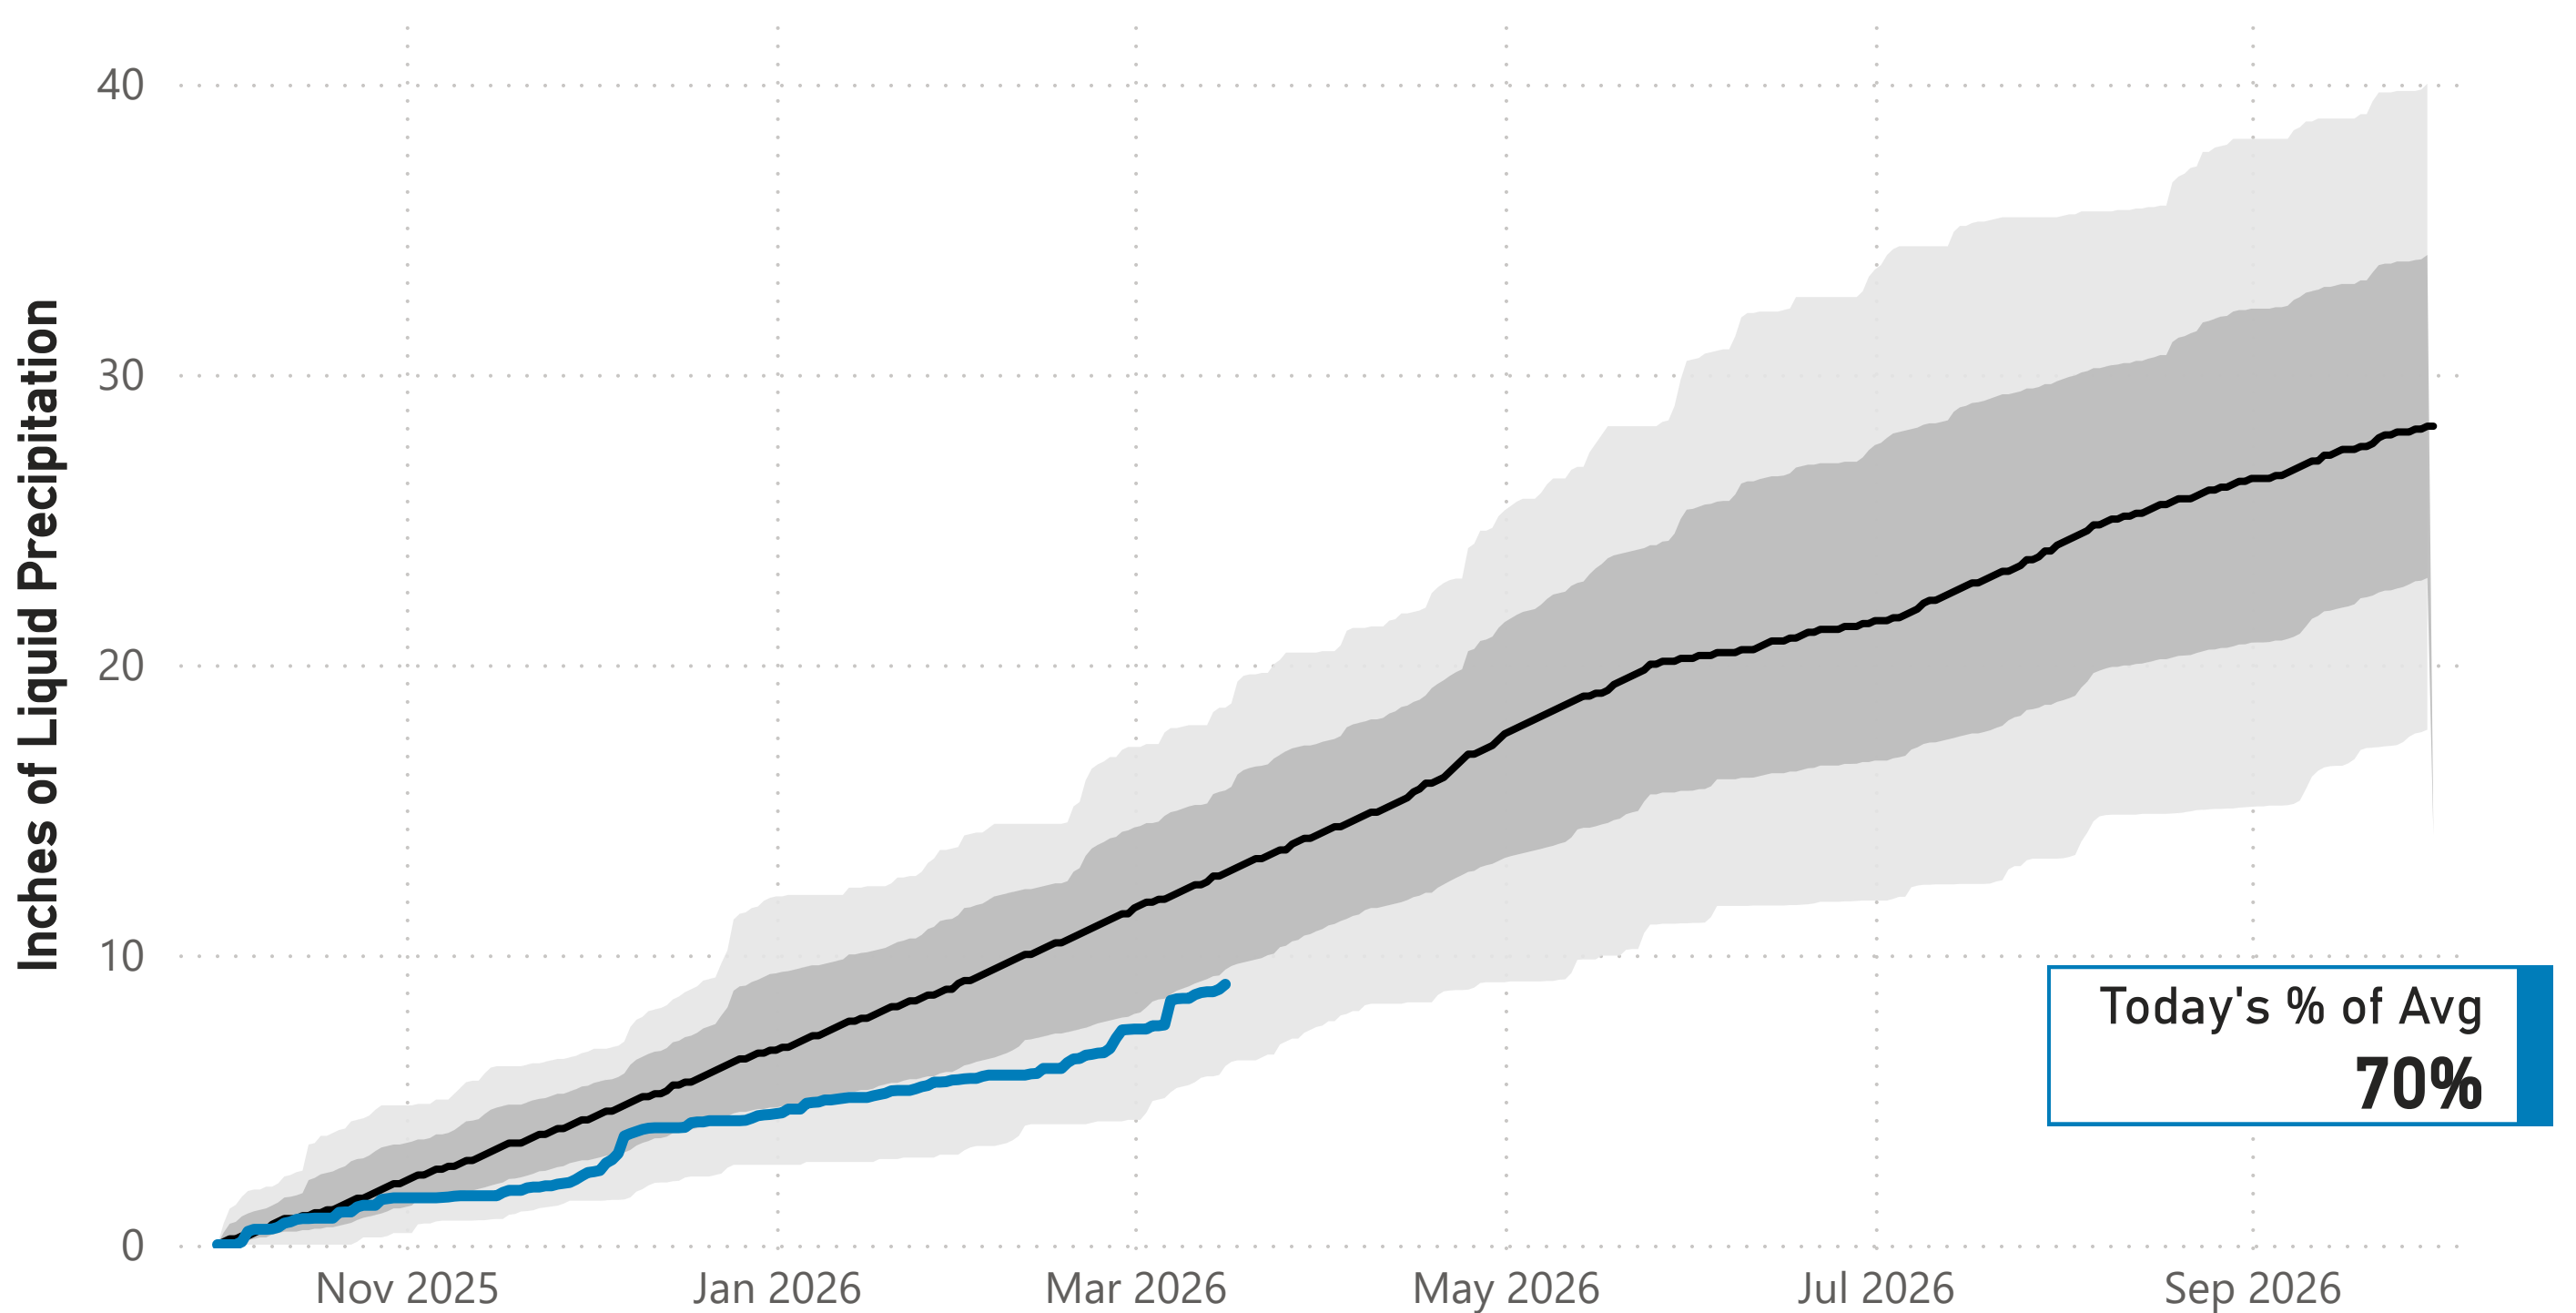

Cumulative Precipitation: Colorado River Watershed

● Average (1991-2020) ● Historical Range (1980-2025) ● 2025-2026

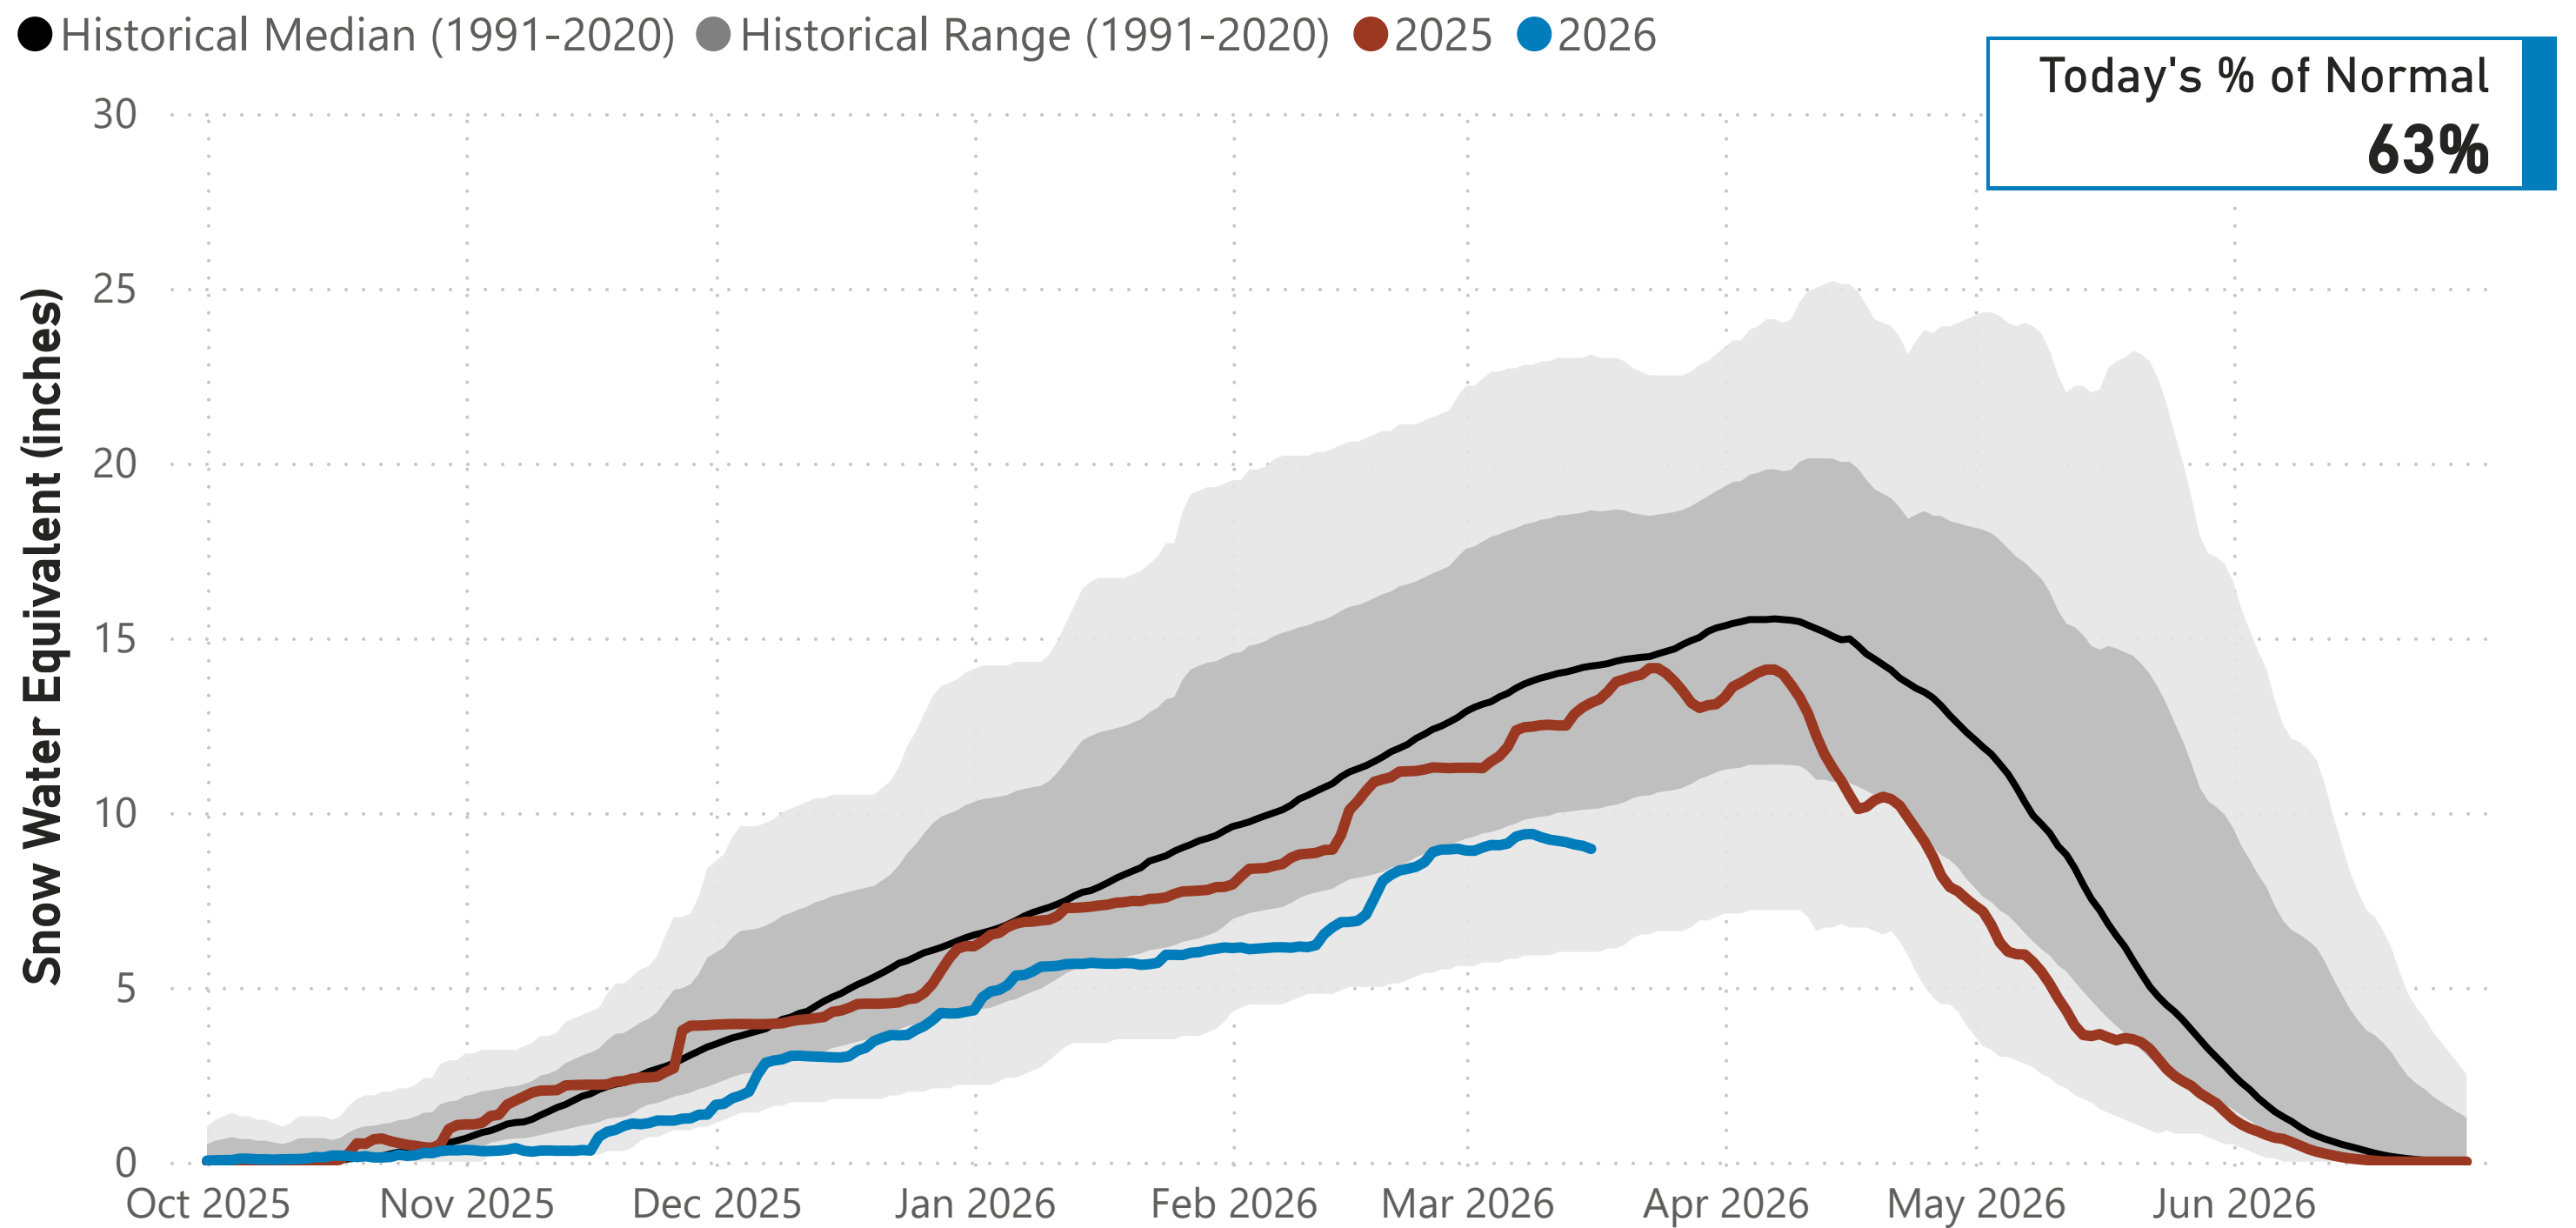

Cumulative Precipitation: South Platte Watershed

● Average (1991-2020) ● Historical Range (1980-2025) ● 2025-2026

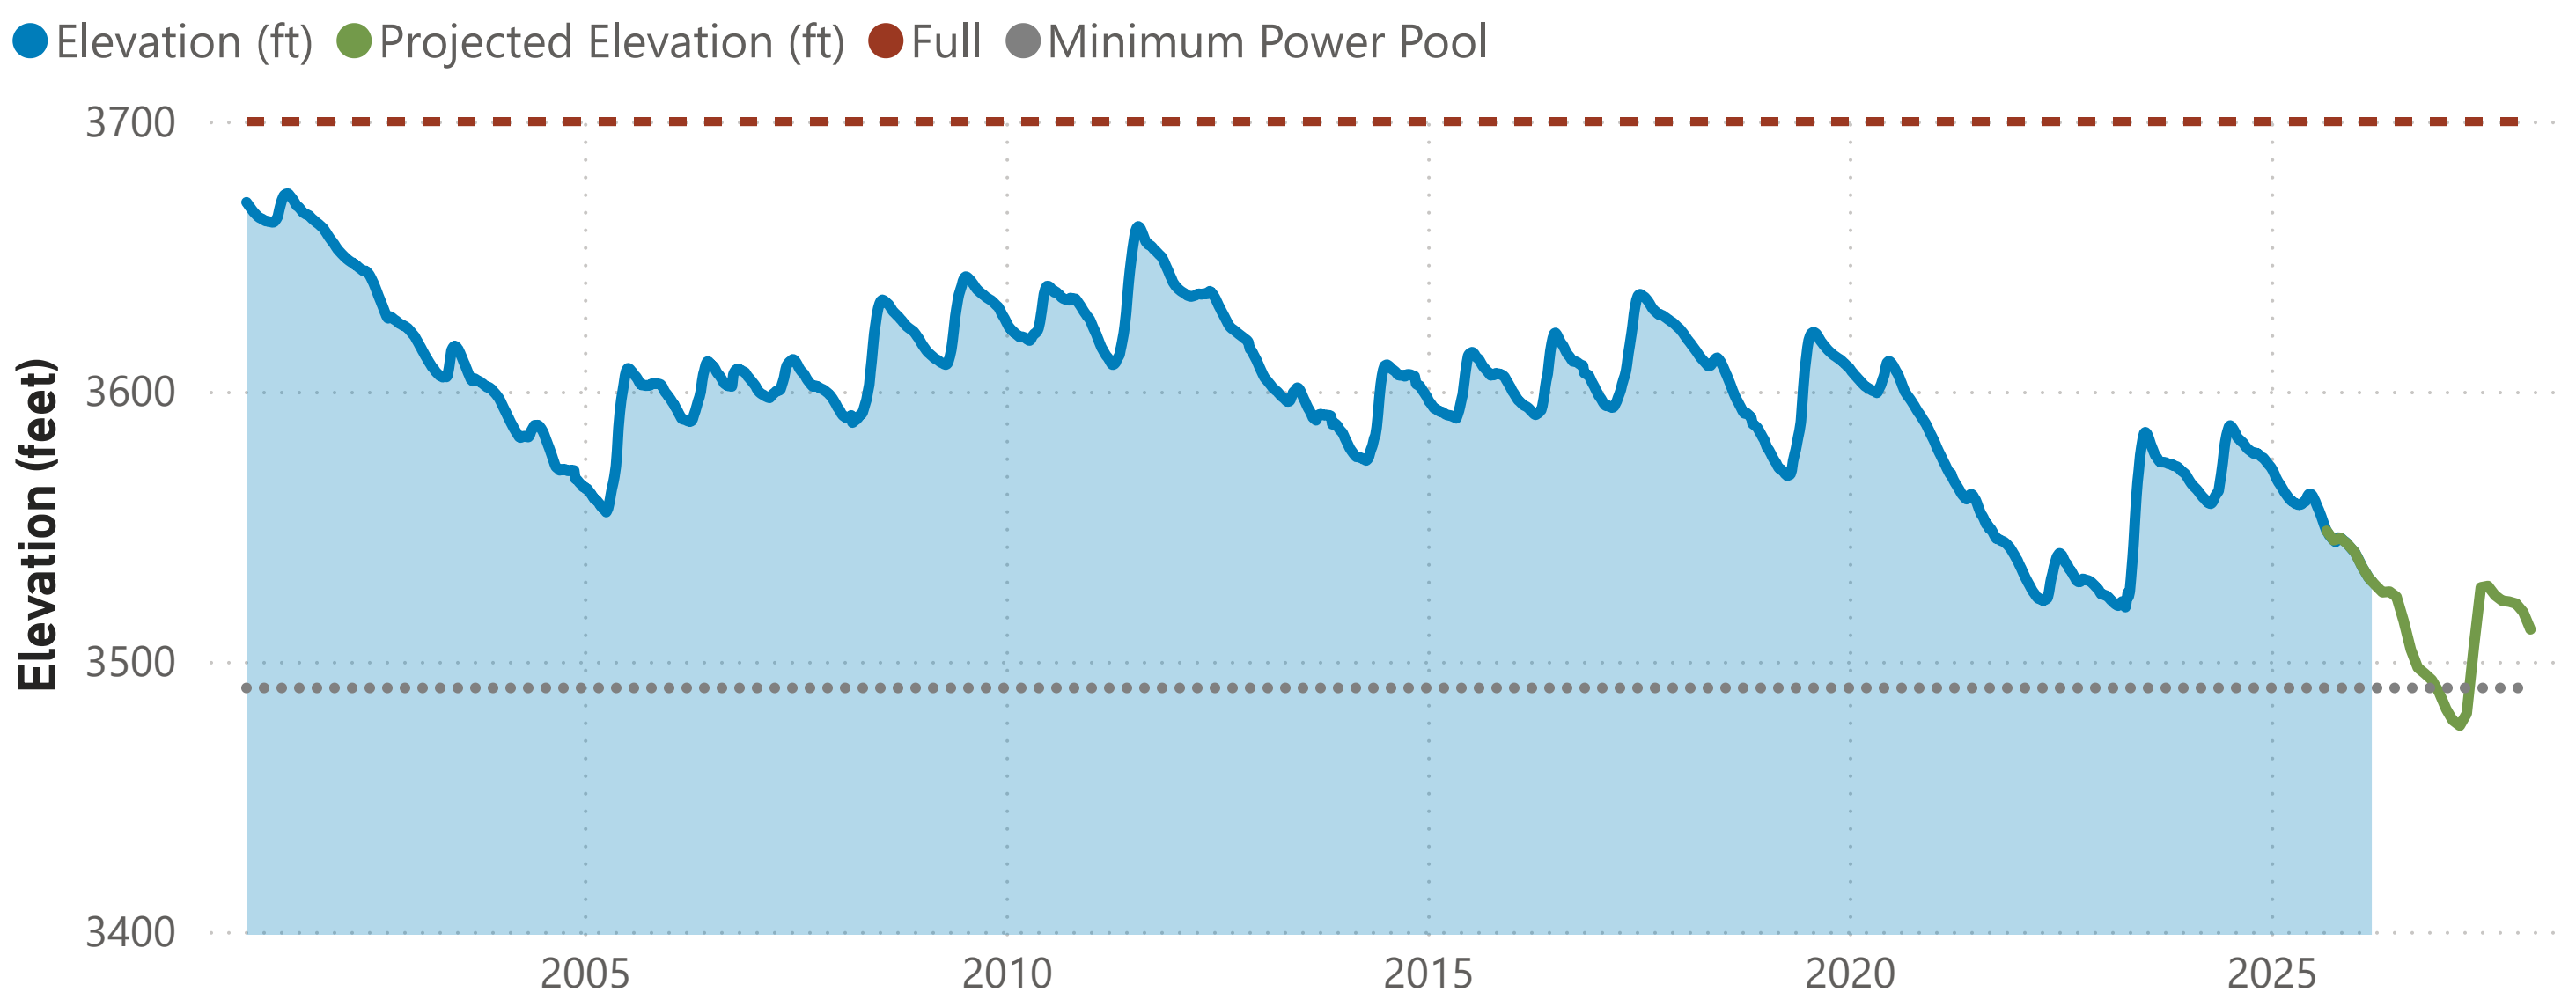

Lake Powell Report*

Colorado River Above Lake Powell Snowpack

Data are from the 104 SNOTEL stations above Lake Powell.

Lake Powell Elevation (2001-Current)

The historical and current Lake Powell elevation data come from the U.S. Bureau of Reclamation website. The projected elevation data are based on the 24-Month Study from the Bureau's Operating Plan for Colorado River System Reservoirs.

Note: * Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.
